Rossing, 2013-11-09 When we wrote the first edition of this book we directed our presentation to the reader with a compelling interest in musical instruments who has a reasonable grasp of physics and who is not frightened by a little mathematics We are delighted to find how many such people there are The opportunity afforded by the preparation of this second edition has allowed us to bring our discussion up to date by including those new insights that have arisen from the work of many dedicated researchers over the past decade We have also taken the opportunity to revise our presentation of some aspects of the subject to make it more general and we hope more immediately accessible We have of course corrected any errors that have come to our attention and we express our thanks to those friends who pointed out such defects in the early printings of the first edition We hope that this book will continue to serve as a guide both to those undertaking research in the field and to those who simply have a deep interest in the subject June 1991 N H F and T D R **Flute, Accordion or Clarinet?** Dawn Loombe, Jo Tomlinson, Amelia Oldfield, 2015-04-21 Music therapists are trained to use their first study instrument in clinical practice yet existing literature focuses almost exclusively on the use of piano basic percussion and voice This illuminating book brings together international music therapists who use a diverse range of musical instruments in their clinical work the clarinet the piano accordion the flute the cello the trumpet and flugelhorn the bassoon the violin the
