very readable and very informative The purpose of this book is to serve as a handbook for analysts data miners and marketing managers at all levels      Data Mining Krzysztof J. Cios,Witold Pedrycz,Roman W. Swiniarski,Lukasz Andrzej Kurgan,2007-10-05 If you torture the data long enough Nature will confess said 1991 Nobel winning economist Ronald Coase The statement is still true However achieving this lofty goal is not easy First long enough may in practice be too long in many applications and thus unacceptable Second to get confession from large data sets one needs to use state of the art torturing tools Third Nature is very stubborn not yielding easily or unwilling to reveal its secrets at all Fortunately while being aware of the above facts the reader a data miner will find several efficient data mining tools described in this excellent book The book discusses various issues connecting the whole spectrum of approaches methods techniques and algorithms falling under the umbrella of data mining It starts with data understanding and preprocessing then goes through a set of methods for supervised and unsupervised learning and concludes with model assessment data security and privacy issues It is this specific approach of using the knowledge discovery process that makes this book a rare one indeed and thus an indispensable addition to many other books on data mining To be more precise this is a book on knowledge discovery from data As for the data sets the easy to make statement is that there is no part of modern human activity left untouched by both the need and the desire to collect data The consequence of such a state of affairs is obvious      **Advances in Artificial Intelligence** Ziad Kobti,Dan Wu,2007-06-22 This book constitutes the refereed proceedings of the 20th Conference of the Canadian Society for Computational Studies of Intelligence Canadian AI 2007 held in Montreal Canada in May 2007 The 46 revised full papers cover agents bioinformatics classification constraint satisfaction data mining knowledge representation and reasoning learning natural language and planning      **Data Mining** Charu C.
