**The Hell That Is Ice** James Markert, 1998-07      **Fire Beneath the Ice** Helen Brooks, 2011-07-15 He wanted passion not commitment Lydia's new boss was a powerfully charismatic man But Lydia dared not surrender to the dangerously sweet attraction she felt toward Wolf Strade He might be icy cool on the outside but he was all fire and passion underneath just a little too hot to handle And Wolf made it clear that love and marriage didn't feature on his agenda whereas Lydia had her tiny daughter Hannah to think of But still she couldn't get Wolf out of her mind Should she try and melt the icy barrier around Wolf's heart and if so how Helen Brooks pens a superb story with rich characters sparkling interplay and a riveting emotional conflict Romantic Times      **The Telescope in the Ice** Mark Bowen, 2017-11-14 IceCube Observatory a South Pole

instrument making the first actual observations of high energy neutrinos has been called the weirdest of the seven wonders of modern astronomy by Scientific American In The Telescope in the Ice Mark Bowen tells the amazing story of the people who built the instrument and the science involved Located near the U S Amundsen Scott Research Station at the geographic South Pole IceCube is unlike most telescopes in that it is not designed to detect light It employs a cubic kilometer of diamond clear ice more than a mile beneath the surface to detect an elementary particle known as the neutrino In 2010 it detected the first extraterrestrial high energy neutrinos and thus gave birth to a new field of astronomy IceCube is also the largest particle physics detector ever built Its scientific goals span not only astrophysics and cosmology but also pure particle physics And since the neutrino is one of the strangest and least understood of the known elementary particles this is fertile ground Neutrino physics is perhaps the most active field in particle physics today and IceCube is at the forefront The Telescope in the Ice is ultimately a book about people and the thrill of the chase the struggle to understand the neutrino and the pioneers and inventors of neutrino astronomy      **The Girl with Ice in Her Veins** Karin Smirnoff, 2025-09-02 Lisbeth
