The Management of Living Beings

or *Emo-management* Delphine Van Hoorebeke, 2018-08-01 This book is based on the author's research carried out over the last ten years in terms of emotional management. It establishes the intervention of emotions at all levels of management, the latter definition of management being the art of the possible, the art of guiding, managing, handling, motivating, even resolving and arranging. Emotion is a subject studied particularly in management in English speaking countries and has become a topic of growing interest in organizational behavior. Emotion is in this book considered based on its etymological origin: ex-movere, put into action by the external factors. The objective is to demonstrate a new vision of responsible management and to confront the current challenges in motion. In this way, the latter tends to take into consideration the living, i.e. the psychobiological, neurological and sociological aspects of people in business.

Unnatural Leadership David L. Dotlich, Peter C. Cairo, 2002-01-24 Written by David Dotlich and Peter Cairo, two of the country's top executive coaches and educators. *Unnatural Leadership* debunks the common notion of the natural leader as a flawless figure. The book describes the truth about being a real leader in a business environment turned upside down by e-commerce, diversity, security concerns, globalization and matrix structures. Drawing on personal experience working with successful leaders in top tier companies throughout the world, Dotlich and Cairo identify a style of leadership used by those who succeed in complicated business and people situations: a style that maximizes a leader's strengths and acknowledges weaknesses.
