Cyberbullies, Cyberactivists, Cyberpredators Lauren Rosewarne, 2016-01-25. Written by an expert in media, popular culture, gender, and sexuality, this book surveys the common archetypes of Internet users from geeks, nerds, and gamers to hackers, scammers, and predators and assesses what these stereotypes reveal about our culture's attitudes regarding gender, technology, intimacy, and identity. The Internet has enabled an exponentially larger number of people, individuals who are members of numerous and vastly different subgroups, to be exposed to one another. As a result, instead of the simple jocks versus geeks paradigm of previous eras, our society now has more detailed stereotypes of the undesirable, the under the radar, and the ostracized: cyberperverts, neckbeards, goths, tech nerds, and anyone with a non-heterosexual identity. Each chapter of this book explores a different stereotype of the Internet user with key themes such as gender, technophobia, and sexuality explored with regard to that specific characterization of online users. Author Lauren Rosewarne, PhD, supplies a highly interdisciplinary perspective that draws on research and theories from a range of fields: psychology, sociology, and communications studies, as well as feminist theory, film theory, political science, and philosophy, to analyze what these stereotypes mean in the context of broader social and cultural issues. From cyberbullies to chronically masturbating porn addicts to desperate online daters, readers will see the paradox in popular culture's message that while Internet use is universal, actual Internet users are somehow subpar: less desirable, less cool, less friendly than everybody else.
