Democracy in Transition Kyriakos N. Demetriou, 2012-12-22 The papers in this collection written by a cross regional group of experts provide insights into the causes of declining levels of citizen participation and other distinct forms of civic activism in Europe and explore a range of factors contributing to apathy and eventually disengagement from vital political processes and institutions At the same time this volume examines informal or unconventional types of civic engagement and political participation corresponding to the rapid advances in culture technology and social networking The volume is divided into three interrelated parts Part I consists of critical essays in the form of theoretical approaches to analysing weakening political participation and citizen estrangement Part II is dedicated to an exploration of the role and deployment of technologically advanced media such as the internet as determinants of changing patterns of political participationist behaviour Finally Part III presents findings of empirical research on the issue of political participation Combining theoretical and empirical perspectives the book contributes towards a better understanding of the disquieting trend of voter apathy and disenchantment with politics in the context of the ongoing process of European integration and offers a variety of analytical tools for decoding both the emergence of alternative conceptualizations of citizenship and other forms of meaningful civic and political engagement

Political Participation in France and Germany Oscar W. Gabriel, Silke I. Keil, Eric Kerrouche, 2013-07-01 How do France and Germany compare in the world of participatory political communities This volume sets out an impressive historical theoretical and institutional framework for a comprehensive comparative and empirical analysis of the forms patterns trends and determinants of citizen participation in two of Europe's largest democracies Written by an international team of political scientists it starts with an outline of the participatory traditions in both countries before turning to the theoretical foundations of empirical research regarding the role of political participation in modern democracies It provides an overview of how the perception of political participation has changed over the years and the forms of both conventional participation particularly with regard to electoral participation and unconventional participation like protest and other new forms of citizen involvement are analysed in detail

Exploring new approaches in participation research social participation is seen as not just correlating with political participation but as a specific form of civic engagement in itself A broad range of activities such as electoral and party related participation political protest participation in voluntary associations voting in referenda and taking part in dialogue orientated participatory activities is examined and the analysis identifies which societal institutional and cultural factors account for the differences and similarities between the two countries Operationalising e-Democracy through a System Engineering Approach in Mauritius and Australia Soobhiraj Bungraz,2020-01-07 This book describes how the Systems Engineering SE methodology can be used to harness technology and enhance democracy within any political system Moreover it provides a practical roadmap for countries and politicians who are willing to change their existing system of governance to one that allows the people to have a meaningful say In this regard the book compares and contrasts two countries Mauritius and Australia highlighting how SE and e democracy can be implemented in different contexts *Size and Democracy* Robert Alan Dahl,Edward R. Tufte,1973 *Politics and Democracy in Microstates* Wouter Veenendaal,2014-10-17 Why are small states statistically more likely to have a democratic political system By addressing this question from a qualitative and comparative methodological angle this book analyses the effects of a small population size on political competition and participation By comparing the four microstates of San Marino Europe St Kitts and Nevis Caribbean Seychelles Africa and Palau Oceania it provides fresh and stimulating insight concluding that the political dynamics of microstates are not as democratic as commonly believed Instead it is found in all four cases that smallness results in personalistic politics dominance of the political executive patron client relations between citizens and politicians and the circumvention of formal political institutions In addition the book suggests that the study of formal institutions provides an incomplete image of microstate democracy and that informal characteristics of politics in microstates also need to be explored in order to better explain the influence of smallness on democracy This book will be of key interest to scholars and students of democracy democratization regional and decentralization studies and comparative politics *Citizenship and Involvement in European Democracies* Jan W. Van Deth,José Ramón Montero,Anders Westholm,2007-02-12 This unique study presents the results of a cross national analysis of citizenship and participation among citizens in twelve European democracies Research on the future and quality of contemporary democracy is usually restricted to focus either on political participation on particular aspects of citizenship or on social activities exclusively This new book offers the first empirical investigation of the relationships both between social and political involvement and between small scale and large scale democracies *Citizenship and Involvement in European Democracies* offers representative samples of the populations in a selection of European countries between 2000 2002 including Denmark Germany East and West Moldova the Netherlands Norway Portugal Romania Russia Slovenia Spain Sweden and Switzerland The leading contributors provide new theoretical insights and offer a broad conceptualization of citizenship stimulating the ongoing discussions about the problems and

challenges of democratic political systems This book has a companion volume entitled Social Capital and Associations in European Democracies edited by William A Maloney and Sigrid Ro teutscher Routledge 2006 Both volumes will be of great interest to students and researchers of European politics comparative politics and sociology **Parliamentary Party Groups in European Democracies** Knut Heidar,Ruud Koole,2003-08-29 The partisan groups in parliament form the link between mass suffrage parties and parliaments and are generally accepted today as necessary instruments of parliamentary business Parliamentary party groups are central actors in most European democracies This volume analyses the manifestations and operations of these actors across thirteen different countries and in the European parliament **Politics in Modern Greece** Keith R. change is limited This book examines whether improvements in participatory opportunities for progressive NGOs results in substantive and normative policy change in one of the major trading powers the European Union Hannah advances a constructivist account of the role of NGOs in the EU s trade policymaking process She argues that NGOs have been instrumental in providing education raising awareness and giving a voice to broader societal concerns about proposed trade deals both when they take advantage of formal participatory opportunities and when they protest from the streets and in the media However the book also highlights how NGO inputs are mediated by the social structure of global trade governance Epistemes the background knowledge ideological and normative beliefs and shared assumptions about how the world works determine who has a voice in global trade governance Showing how NGOs succeed only when their advocacy conforms broadly to the dominant episteme this book will be of value to scholars and students with an interest in NGOs and international trade negotiations It will also be of interest to policymakers national trade negotiators government departments and the trade policy community **Social Capital and Associations in European Democracies** William A.

A. W. Rhodes,Vincent Wright,2025-09-12

Tensions in the Territorial Politics of Western Europe 1987 examines the massive postwar increase in European government intervention a major element being the development of welfare services provided by sub central units of government Governments have faced the dilemma of being electorally accountable for services delivered through differentiated disaggregated policy systems The territorial distribution of functions has become a major political and policy issue and government centres have developed strategies for regulating the function based policy system The term territorial politics refers to the arena of political activity concerned with the relations between central and sub central organisations while recognising the need to return to history The objectives of this work are to argue for a focus on territorial politics to demonstrate that the analysis of territorial politics requires an exploration of historical context and to analyse contemporary problems in territorial politics focusing on functional allocation interest articulation central regulation and the distributional consequence of policy networks **Bulletin of the Atomic Scientists** ,1975-03 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world Institutional

Cosmopolitanism Luis Cabrera,2018-09-25 Is a global institutional order composed of sovereign states fit for cosmopolitan moral purpose Cosmopolitan political theorists challenge claims that states nations or other collectives have ultimate moral significance They focus instead on individuals on what they share and on what each may owe to all the others They see principles of distributive justice and increasingly political justice applying with force in a global system in which billions

continue to suffer from severe poverty and deprivation political repression interstate violence and other ills Cosmopolitans diverge widely however on the institutional implications of their shared moral view Some argue that the current system of competing sovereign states tends to promote unjust outcomes and stands in need of deep structural reform Others reject such claims and contend that justice can be pursued through transforming the orientations and conduct of individual and collective agents especially states This volume brings together prominent political theorists and International Relations scholars including some skeptics of cosmopolitanism in a far ranging dialogue about the institutional implications of the cosmopolitan approach Contributors offer penetrating analyses of both continuing and emerging issues around state sovereignty democratic autonomy and accountability and the promotion and protection of human rights They also debate potential reforms of the current global system from the transformation of cities and states to the creation of some encompassing world government capable of effectively promoting cosmopolitan aims **Democracy in Plural Societies**

Arend Lijphart, 1977-01-01 While it may be difficult to achieve and maintain stable democratic governments in countries with deep religious ideological linguistic cultural or ethnic cleavages Lijphart argues that it is not at all impossible Through the analysis of political systems in six continents he demonstrates that what he calls consociational democracy can be successful in severely divided or plural societies Here once again Arend Lijphart is directing our attention to matters which will surely engage much of the attention of students of comparative politics in the next decade G Bingham Powell Jr American Political Science Review A study which can speak to such a wide audience in political science deserves a warm welcome from the profession Government and Opposition A copybook example of the comparative method of political analysis as well as indispensable reading for all who have an interest in the nature and prospects of representative democracy whether in Europe or beyond The Times Higher Education Supplement This well written work containing a wealth of information on politics of many diverse nations is highly recommended Library Journal **Toward Democracy--a Journey** Robert A.
