book covers Rudolf Steiner's biography presented from an educational point of view and also unfolds the different aspects of Steiner's educational thought in Waldorf Education. His point of view is unique in that it relates education to a wide horizon of different contexts such as social, pedagogical, evolutionary and spiritual aspects. His ideas are philosophical, ethical, epistemological, ontological. However, above all, they are based on spiritual understanding of the human being and the world. In many ways, they stand in stark contrast to the views that inform present mainstream educational thought and practice. Nevertheless, there are points where Steiner's ideas can find a resonance in more recent educational thought. Steiner was in many ways ahead of his time, and his educational ideas are still relevant to many present-day educational issues and problems.

The Spiritual Emerson Ralph Waldo Emerson, 2008-07-31 This concise volume collects the core writings that have made Ralph Waldo Emerson into a key source of insight for spiritual seekers of every faith, with an introduction by the bestselling philosopher Jacob Needleman. Here is the essential collection of Emerson's spiritual thought for those readers who understand the transformative quality of ideas. It is concise and suited to years of rereading and contemplation, offering the essays that trace the arc of the inner message brought by America's Yankee Mystic. The Spiritual Emerson features many of Emerson's landmark works. Yet also included are overlooked classics such as the essays *Fate and Success*, which served as major sources of inspiration to some of the leading American metaphysical thinkers of the late nineteenth and early twentieth centuries. The introduction by religious scholar and philosopher Jacob Needleman frames historically and philosophically the development of Emerson's thought and explores why it has such a powerful hold on us today. *Handbook of American Romanticism* Philipp Löffler, Clemens Spahr, Jan Stievermann, 2021-07-05 The Handbook of American Romanticism presents a comprehensive survey of the various schools, authors and works that constituted antebellum literature in the United States. The volume is designed to feature a selection of representative case studies and to assess them within two complementary frameworks: the most relevant historical, political and institutional contexts of the antebellum decades and the consequent reappropriations of the Romantic period by academic literary criticism in the twentieth and early twenty-first centuries.

Exploring New Religions George D. Chryssides, 1999-12-01 An objective, well-researched history of contemporary new religions and cults. New religious movements, popularly known as cults, arouse strong public opinion, and most books on the subject are polemical, giving hostile reaction rather than informed exploration. *Exploring New Religions* provides an account of a wide variety of new religions, focusing on their origins, beliefs and practices, which are set out in a dispassionate way, leaving readers to form their own value judgements. George Chryssides provides important analysis of the 'killer cults': the Jonestown People's Temple, Waco, the Solar Temple and Heaven's Gate, examining the factors that made their followers willing to die for their cause. Older groups like the Jehovah's Witnesses and Latter-day Saints, Mormons are discussed, and Chryssides traces the development of a variety of strands of spirituality ranging from New Thought, Spiritualism and Theosophy. Subsequent chapters include the Baha'i, the Family (formerly Children of God), the Hare Krishna movement, ISKCON.

the Jesus Army the Rastafarians the Church of Scientology Transcendental Meditation TM and the Unification Church the Moonies Lower profile groups are also discussed including EST Erhard Seminar Training the New Kadampa Tradition Brahma Kumaris Sai Baba Subud and the Western Buddhist Order A study of the New Age phenomenon and an account of societal responses to new religions at religious societal and political levels is also included **Education and the Soul** John P. Miller,2000-01-01 With emphasis on preparing students for jobs standards and achievement testing many think that North American education has become inwardly deadening yet this book provides a counterbalance as it offers a way to nurture the soul in classrooms and schools Varieties of Transcendental Experience Donald L. Gelpi SJ,2007-08-15 This study traces the critique of Enlightenment modernism that began with Ralph Waldo Emerson and culminated in the thought of Charles Sanders Peirce and the mature Josiah Royce Varieties of Transcendental Experience argues that these thinkers provide a constructive alternative to deconstructionist postmodernism that is compatible with the Christian faith **The 'Spiritual Death' of Jesus** William Atkinson,2009-03-16 The teaching of Kenyon Hagin and Copeland that Jesus died spiritually JDS is important because of the influence of these men not least on Pentecostalism This title states that adoption of JDS by Pentecostalism would be damaging in several respects and thus draw the latter away from its moorings in traditional Christianity **Supplement to Ralph Waldo Emerson, a Descriptive Bibliography** Joel Myerson,2005 **Approaches to Teaching the Works of Ralph Waldo Emerson** Mark C. Boundaries of Transformative Learning E. O'Sullivan,A. Morrell,M. O'Connor,2016-04-30 Transformative learning involves experiencing a deep structural shift in the basic premises of thought feelings and actions It is a shift of consciousness that dramatically and permanently alters our way of being in the world Such a shift involves our understanding of ourselves and our self locations our relationships with other humans and with the natural world our understanding of relations of power in interlocking structures of class race and gender our body awarenesses our visions of alternative approaches to living and our sense of possibilities for social justice and peace and personal joy The editors of this collection make several challenges to the existing field of transformative learning the first is to theoreticians who have attempted to describe the nature of transformative learning without regard to the content of transformative learning The editors argue that transformative learning theory cannot be constructed in a content neutral or context free way Their second challenge which assumes the importance content for transformative learning is to educators as practitioners The editors argue that transformative learning requires new educational practices consistent with the content Arts based research and arts based teaching learning practices are one example of such new educational practices Education for the soul or spiritual practices such as meditation or modified martial arts or indigenous peoples forms of teaching learning is another example Each article in the collection presents a possible model of these new practices *Hartmann's Who's who in Occult, Psychic and Spiritual Realms...in the United States and Foreign Countries ,1927*
