Alan S. Milward

The European Coal And Steel Community 1951 70 The European Communities Vol 1:

An Economic and Social History of Western Europe since 1945 Anthony Sutcliffe, 2014-09-19 This is the ideal companion text to *A Political History of Western Europe Since 1945* It is an introductory survey which explains how western Europe built up its postwar prosperity and is moving towards continental integration Themes treated include the origins of the EC consumerism youth culture and protest immigration the oil crisis and its aftermath and the contrasting experience and expectations of the Nordic world and the Mediterranean south The book ends with the consequences of Soviet collapse Designed for general history students it assumes no formal knowledge of economics and is notably accessible and user friendly in its approach

Towards a Comparative History of Coalfield Societies Andy Croll, 2017-05-15 Few areas of labour history have received as much attention as the coal industry with miners often finding themselves at the centre of studies on working class political and industrial history Yet whilst much has been written about the struggles of miners and their unions in particular countries their national confrontations and political organization much less work has been done on the regional communities and how they related both to the national and international picture The central theme of this volume is to transcend such over arching national models and to focus instead on local coal mining societies which can then be compared and contrasted to similar communities elsewhere In so doing the book is able to tackle a number of familiar labour history themes in a more nuanced way exploring issues of political activism and class relationships from the perspectives of gender ethnicity race and specific localized cultural traditions As the chapters in this volume illustrate such an approach can offer rich and often surprising conclusions in many cases challenging the accepted notion of miners as the vanguard of militant working class political activism Adopting a regional approach that compares coalfield communities from five continents this volume reflects coalfield experiences on a truly global scale By looking at what made communities unique as well as what they shared in common a much fuller understanding of the workplace neighbourhood family identity and political organization is possible Underlining the strong connections between politics community and identity this work emphasizes the challenges and opportunities available to labour historians pushing forward the boundaries of the discipline in new and exciting ways

A Handbook of International Economic Institutions M. A. G. van Meerhaeghe, 2012-12-06 What made me write this book was a feeling that students of international economics needed to find out their knowledge of the theory with work on the practice of the major international economic organizations many of which are having a growing influence on the national economies of their members There was no single volume given over to a concise treatment of these organizations of the international organizations themselves can be seen The annual reports suited of course but as a rule these are not noted for being brief and to the point the items of importance have to be fished out of a sea of useless detail nor do they go in for criticism of their own activities In selecting the organizations to be dealt with in the book I was guided by the influence they exert I have left out those whose activities consist mainly in the drafting recommendations to which

however meritorious they may be little or no attention is paid Some of them are included in the Introduction which provides a summary of a number of institutions not discussed separately in the body of the work There are however two exceptions the Organization for Economic Cooperation and Development OECD as the organization replacing the Organization for European Economic Cooperation OEEC and the United Nations Conference on Trade and Development UNCTAD whose meetings have succeeded in drawing much attention of the press

Economic and Social Perspectives on European Migration Francesca Fauri, Debora Mantovani, Donatella Strangio, 2020-12-29 This book addresses a wide range of migration related issues in the European context and examines the socioeconomic consequences of migratory flows throughout Europe focusing on a number of emblematic European countries The book is divided into three parts The first part deals with the tension between migrants and their integration processes in the receiving country which is deeply influenced by the attitude of the local population and the different approach to highly and less skilled immigrants The second part analyses the impact of migration on the economic structure of the receiving country while the third part explores the varying degree of immigrants socioeconomic integration in the country of destination The book offers an essential interdisciplinary contribution to the issue of migration and provides readers with a better understanding of the effects that different forms of migration have had and will continue to exert on economic and social change in host countries It also examines migration policy issues and builds on historical and empirical case studies with policy recommendations on labour market integration and welfare policy issues The book is addressed to a wide audience including researchers academics and students of economics sociology politics and history as well as government EU officials working on migration topics

Exploring European Social Policy Robert R. Geyer, 2013-05-02 With the growing challenges of economic globalization and national welfare state retrenchment the development and future of EU social policy has become increasingly important This exciting new textbook provides a comprehensive detailed and up to date overview of this contested area and examines whether EU social policy is strengthening or weakening European social policy regimes The book begins with a general outline of the postwar development of EU social policy and its evolving relationship to the theory and practice of European integration Then it provides a detailed and theoretically engaged description of the main areas of EU social policy including labour gender anti poverty anti discrimination elderly disability youth and public health policy There is also a chapter exploring the social policy role of the structural funds particularly the European Social Fund The book concludes by arguing against both sides of the strengthening weakening debate calling for a more subtle analysis of the effects of EU social policy on national social policy regimes This book is the most up to date and comprehensive available and offers the reader a detailed and accessible exploration of the area It will be essential reading for anyone studying the EU or national social policy as well as for practitioners in the field

Library of Congress Catalogs Library of Congress, 1977 **Selection of Decision-Making Models in Intergovernmental Organizations: A Polyheuristic Approach to Political Regime Type Influence** Timothy Tamutana Tamunang, 2021-03-15 Until recently Political Psychology of International Relations has attracted very few scholars attention in explaining states behaviors and attitudes as a juridical person In reality international relations scholarly works especially related to Intergovernmental organizations have shown that rational structural and functional accounts have failed to fully capture the underline nature of these institutions A polyheuristic approach doesn't only solve these theoretical shortcomings but also allows for the close examination of states attitudes and behaviors in making choices that would serve as tools for expected interests This gives a chance to retrospect how were these bodies created what were the environmental factors that led to their formations and the nature of founders Since organizations are adepts of metamorphosis it is interesting to watch their overall changes This book present not only the existing views within the subject but also provides additional information which the author has proven to be relevant *Sources of Information on the European Communities* Doris M. The Reconstruction of Western Europe 1945-1951 Alan S. Milward, 2013-11-05 First Published in 2005 The author's intention was to write a history of the greatest economic boom in European history of that unique ugly and triumphant experience of the 1950s and 1960s which changed so utterly the scope of human existence and expectations as well as the consciousness of the people of western Europe But it became clear that this extraordinary boom had one other attribute as unique as the remarkable length of time over which the growth of output incomes and wealth lasted National Union Catalog, 1973 Includes entries for maps and atlases *General Catalogue of Printed Books* British Museum.
