The Evaluation Of Social Programs:

The Evaluation of Social Programs Abt Associates, 1976 Evaluation has rapidly developed into an exciting interdisciplinary academic and applied research field. Indications are that this specialty will continue to expand and become more rigorous and demanding. Vast numbers of fields and different methodologies are using evaluation research techniques now. Yet relatively little attention has been paid to the consequences of systematic evaluation practice particularly as it affects the development and in some cases continued existence of numerous social programs. The Evaluation of Social Programs addresses these questions. It is a unique book offering up to date views of experts drawn from government universities, charitable foundations and independent research organizations who are leading practitioners or consumers of social programs research. Dust jacket Program Evaluation for Social Workers Richard M. Grinnell Jr, Peter A. Gabor, Yvonne A. Unrau, 2015-10-19 Now in its seventh edition this comprehensive text once again provides beginning social work students and practitioners with a proven time tested approach to help them understand and appreciate how to use basic evaluation techniques within their individual cases case level and the programs where they work program level. As with the previous six editions this text is eminently approachable, accessible, straightforward and most importantly practical. The Evaluation of Social Programs C. C. Abt, 1977-01-01 The varying opinions and viewpoints presented in The Evaluation of Social Programs offer a lively debate over the uses of evaluation research and its practical applications in a multitude of settings, a debate which has serious and far reaching implications for social scientists, government policy makers and all other producers and consumers of applied social research. It adds up to a unique insight into the views of the elite of American evaluators and their relation with those who use their services. Although 500 pages long it is never boring, rarely obvious and always realistic. It is worth its high cost to both customers and contractors. Journal of Social Policy Vol 7 No 2 April 1978 Evaluating Federal Social Programs Sar A. Levitan, Gregory K. Wurzburg, 1979 Monograph on the evaluation of social policy programmes in the USA discusses the application of evaluation techniques and the use of evaluation within the institutional framework legislative and executive branches with particular reference to the new department and the labour administration. Designing Evaluations of Educational and Social Programs Lee Joseph Cronbach, Karen Shapiro, 1982 Designing an evaluation is rather an art as each must be designed according to its appropriateness to the situation being evaluated The advantages of each feature of the design must be balanced against any sacrifices each of these choices entail Designers must plan for the allocation of investigative resources selecting investigative questions that are most apt and be aware of both practical and political considerations This volume includes both new approaches to the design of educational evaluations and discusses the pros and cons of frequently used design concepts

Program Evaluation for Social Workers Richard M. Grinnell, Peter A. Gabor, Yvonne A. Unrau, 2018-12-27 Over the course of 20 years and eight editions the goals of the book have remained the same to prepare students to participate in evaluative activities within their organizations become beginning critical producers and consumers of the professional evaluative literature and reap the benefits of more advanced evaluation courses and texts The authors aim to meet these objectives by presenting a unique approach that is realistic practical applied and user friendly Unlike other textbooks on the market Program Evaluation for Social Workers presents both program level evaluation and case level evaluation methods assuming that neither of these two distinct approaches alone adequately reflects the realities of the field the book demonstrates how they can instead complement each other This integration of approaches provides an accessible adaptable and realistic framework for students and beginning practitioners to more easily grasp and implement in the real world

Lumsdaine, 2013-09-24 Evaluation and Experiment Some Critical Issues in Assessing Social Programs is a collection of papers presented at the 1973 symposium held at The Battelle Seattle Research Center This book contains eight chapters that consider some selected aspects of the problems in evaluating the outcomes of socially important programs such as those dealing with education health and economic policy The first chapter provides an overview of the issues around the Social Program Evaluation The next chapters deal with the successes and failures brought by social innovations the quasi experimental evaluation in compensatory education to estimate the true effects of such education programs and the usefulness and validity of econometric and related nonexperimental approaches for assessing the effects of social programs These topics are followed by surveys of a number of additional program evaluation studies particularly in the field of family planning or fertility control mostly carried out as experiments or quasi

experiments in Asian and Latin American countries Other chapters describe the decision processes that involve explicit assessment of the worth or merit of outcomes and employ multivalued utility analysis and outline the ways in which evaluative data are useful in providing feedback to program or institutional operations and decisions The final chapter discusses resolutions for some of the disagreements expressed by others concerning the role of field experiments constraints in their utilization and other factors that enter into a comprehensive conception of program evaluation
