The Ever Present Origin The Foundations And Manifestations Of The Aperspectival World:

The Ever-Present Origin Jean Gebser, 2020-08-25 This English translation of Gebser's major work *Ursprung und Gegenwart* Stuttgart Deutsche Verlag 1966 offers certain fundamental insights which should be beneficial to any sensitive scientist and makes it available to the English speaking world for the recognition it deserves The path which led Gebser to his new and universal perception of the world is briefly as follows In the wake of materialism and social change man had been described in the early years of our century as the dead end of nature Freud had redefined culture as illness a result of drive sublimation Klages had called the spirit and he was surely speaking of the hypertrophied intellect the adversary of the soul propounding a return to a life like that of the Pelasgi the aboriginal inhabitants of Greece and Spengler had declared the Demise of the West during the years following World War I The consequences of such pessimism continued to proliferate long after its foundations had been superseded It was with these foundations the natural sciences that Gebser began As early as Planck it was known that matter was not at all what materialists had believed it to be and since 1943 Gebser has repeatedly emphasized that the so called crisis of Western culture was in fact an essential restructuration Gebser has noted two results that are of particular significance first the abandonment of materialistic determinism of a one sided mechanistic causal mode of thought and second a manifest urgency of attempts to discover a universal way of observing things and to overcome the inner division of contemporary man who as a result of his one sided rational orientation thinks only in dualisms Against this background of recent discoveries and conclusions in the natural sciences Gebser discerned the outlines of a potential human universality He also sensed the necessity to go beyond the confines of this first treatise so as to include the humanities such as political economics and sociology as well as the arts in a discussion along similar lines This was the point of departure of *The Ever Present Origin* From In memoriam Jean Gebser by Jean Keckeis *God and the Evolving Universe* James Redfield, Michael Murphy, Sylvia Timbers, 2003-01-06 In a world racked by violence and conflict James Redfield and Michael Murphy leading cocreators of today's spiritual boom present a message of hope and a vision for the future It is no accident they argue that the twentieth and early twenty first centuries have witnessed a revolution in new human capacities Daily we hear and read about supernormal athletic feats clairvoyant perception lives transformed by meditative practices healing through prayer and we ourselves experience these things The authors contend that thousands of years of human striving have delivered us to this very moment in which each act of self development is creating a new stage in planetary evolution and the emergence of a human species possessed of vastly expanded potential **The Music Producer's**

The Ecstatic and the Archaic Paul Bishop, Leslie Gardner, 2018-03-15 The word archaic derives from the Greek *arkhaios* which in turn is related to the word *arch* meaning principle origin or cause the notion of ecstasy or *ekstasis* implies standing outside or beyond oneself a self transcendence How these two concepts are articulated and co implicated constitutes the core question underlying this edited collection which examines both the present day and antiquity in order to trace the insistent presence of the ecstatic amid the archaic Presented in three parts the contributors to this diverse book take the concept of the archaic in an entirely new direction Part I Ecstasy and the psychological covers topics including Jung Freud ancient psychotherapy desire and theatre Part II Ecstatic archaic history considers Ludwig Klages Orestes and Dionysus Finally Part III Ancient ecstatic in other worlds examines Luo Guanzhong's Three Kingdoms and Enki at Eridu The collection offers a distinctive contextualisation of the dimension of the archaic in relation to the ecstatic experience The Ecstatic and the Archaic will appeal to readers interested in the relationship between ancient and postmodern worlds and in how the past manifests itself in the present It will be of great interest to academics and students of Jungian and post Jungian ideas classical religions and the history of ideas as well as practitioners of analytical psychology and psychoanalysis

Dawn of the Akashic Age Ervin Laszlo, Kingsley L. Dennis, 2013-05-20 A preview of the post mechanistic holistic world in 2020 and 2030 as well as a map of the obstacles we must overcome to get there Reveals how the youngest generation is seeding the shift in consciousness Explains how society will be reorganized into grassroots networks like those revealed by quantum physics and experienced through social media With contributions from futurist John L Petersen ex CEO of Sanyo Tomoya Nonaka media activist Duane Elgin and other visionaries The world is changing The transition from the mechanistic worldview to one that recognizes the interconnectedness of all life is upon us It is the dawning of the Akashic Age The Akashic field that connects the universe is now recognized by cutting edge science What we know about communication energy and consciousness is rapidly evolving in

tandem with the new quantum worldview Many adults are consciously evolving to meet the transitional challenges at hand while today's youth have arrived already hard wired with the new consciousness Rising from the ashes of the old systems this Phoenix generation of radical change agents is seeding our evolution and spiritual transformation a process that will continue over the next few decades Authors Ervin Laszlo and Kingsley Dennis look at the chief engine of the coming changes the growing global understanding of nonlocality and the development of practical applications for it They examine how the new values and new consciousness taking hold will reorganize society from top down hierarchies into grassroots networks like those revealed through quantum physics understanding of energy and information waves and experienced daily by millions through social media With contributions from visionary thinkers such as futurist John L Petersen ex CEO of Sanyo Tomoya Nonaka media activist Duane Elgin systems scientist Alexander Laszlo and spiritual economist Charles Eisenstein this book explores the future of education spirituality the media economics food and planetary citizenship as well as the expansion of consciousness necessary to reach that future

A Secret History of Consciousness Gary Lachman, 2003-07 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read

Spa Medicine Graham Simpson, Stephen T. Sinatra, Jorge Suarez-Menendez, 2004 Provides proven longevity strategies that restore balance to stressful lives and promote optimum health The authors describe four wellness pillars that are the foundation of the medi spa approach

Integral Yoga Psychology Debashish Banerji, 2020-05-28 Integral Yoga Psychology is a new attempt to position the Integral Yoga of Sri Aurobindo and the Mother within the frame of yoga psychology as an inquiry related to transpersonal and whole person psychologies This book contains 11 essays by leading scholar practitioners of integral yoga sketching its possibility space as

a psychology It attempts this through a hermeneutics of the texts of Sri Aurobindo and the Mother as well as their own and their disciples practices and experiences It also makes a beginning at locating the field in its larger contexts through comparative qualitative and empirical studies as well as probing the clinical possibilities of its models

Why Materialism Is Baloney Bernardo Kastrup, 2014-04-25 The present framing of the cultural debate in terms of materialism versus religion has allowed materialism to go unchallenged as the only rationally viable metaphysics This book seeks to change this It uncovers the absurd implications of materialism and then uniquely presents a hard nosed non materialist metaphysics substantiated by skepticism hard empirical evidence and clear logical argumentation It lays out a coherent framework upon which one can interpret and make sense of every natural phenomenon and physical law as well as the modalities of human consciousness without materialist assumptions According to this framework the brain is merely the image of a self localization process of mind analogously to how a whirlpool is the image of a self localization process of water The brain doesn't generate mind in the same way that a whirlpool doesn't generate water It is the brain that is in mind not mind in the brain Physical death is merely a de-clenching of awareness The book closes with a series of educated speculations regarding the afterlife psychic phenomena and other related subjects

Integral Polity Ronnie Lessem, Ibrahim Abouleish, Louis Herman, 2016-05-23 Releasing the genius of an individual an enterprise and a society is a central pre-occupation of the contemporary business environment A fascinating approach to how we can begin to tackle this challenge is presented by the authors of Integral Polity Integral spirituality integral philosophy and the integral age at an overall or holistic level of consciousness has therefore become a strong enough idea to form the genesis of a movement over the course of the last half century Taking as a starting point the ground breaking work of the Trans4m Centre for Integral Development this book applies such an integral notion to the realms of business economics and enterprise To be successful an integral approach must recognise the nuances of its environment an integral approach in India is different from that in Indonesia or Iceland and they may in fact complement rather than conflict Therefore this book also provides a fascinating alignment of such integrality with and between different southern and eastern northern and western worlds Using case studies ranging across the globe this review of a newly integral theory and practice provides a new lease of life to what may increasingly be perceived as the self-seeking insulated and occasionally violent and corrupt realm of the political
