**Owsei Temkin**

## **The Evolution Of Organic Forms:**

**Pre-organic Evolution and the Biblical Idea of God** Charles Chapman, 1891      **Approaches to Organic Form** F.R. Burwick, 2012-12-06 Frederick Burwick's modest but comprehensive and insightful introduction is preface enough to these sensible essays in the history and philosophical criticism of ideas. If we want to understand how some inquiring and intelligent thinkers sought to go beyond mechanism and vitalism, we will find Burwick's labors of assembling others and reflecting on his own part to be as stimulating as anywhere to be found. And yet his initial cautious remark is right: approaches, not attainments. The problems associated with clarifying matter and form are still beyond any consensus as to their solution. Even more do we recognize the many forms and meanings of form, and this is so even for organic form. That wise scientist-philosopher-engineer Lancelot Law Whyte struggled in a place neighboring to Burwick's, and his essay of thirty years ago might be a scientist's preface to Burwick, and his colleagues see Whyte's *Accent on Form* (NY: Harper, 1954) and his *Symposium of 1951: Aspects of Form* (London: Percy Lund Humphries, 1951) and Indiana University Press, 1961) itself arranged in honor of D'Arcy Thompson's classical monograph *On Growth and Form*. Philosophy and history of science must deal with these issues, and with the mixture of hard-headedness and imagination that they demand.      **Organic Evolution Considered** Alfred Fairhurst, 1897      **Experimental American Poetry and the New Organic Form** João Paulo Guimarães, 2025-01-09 Arguing that the 19th-century concept of living form—the idea that like an organism, a poem develops itself from within according to an internal logic—is not, as some critics have argued, anathema to avant-garde writing, this book contends that the concept survived and flourished in the work of a number of contemporary experimental poets. Indebted to 19th-century science, the notion of a living form endured throughout the 20th century, and the poetic vanguard's word games and collages mirrored the disjunctive frameworks that redefined how scientists made sense of life in the age of networks and non-linear systems. Featuring readings of texts from poets including Ed Dorn, A.M.J. Crawford, P. Inman, Chris Vitiello, and Christian Bök, this book shows how a number of vanguardist poets explores the commonalities they detected between nature's processes of creation and their own methods of composition. In doing so, it highlights devices like punning, paragrammatic play, metamorphic figuration, and memetic repetition mechanisms these poets find at work in the cybernetic, genetic, and digital systems they investigate in their poems.      **Encyclopedia of Time** H. James Birx, 2009-01-13 Surveying the major facts, concepts, theories, and speculations that infuse our present comprehension of time, the *Encyclopedia of Time: Science, Philosophy, Theology, and Culture* explores the contributions of scientists, philosophers, theologians, and creative artists from ancient times to the present. By drawing together into one collection ideas from scholars around the globe and in a wide range of disciplines, this Encyclopedia will provide readers with a greater understanding of and appreciation for the elusive phenomenon experienced as time. Features surveys of historical thought about time, including those that emerged in ancient Greece, early Christianity, the Italian Renaissance, the Age of Enlightenment, and other periods. Covers the original and lasting

insights of evolutionary biologist Charles Darwin physicist Albert Einstein philosopher Alfred North Whitehead and theologian Pierre Teilhard de Chardin Discusses the significance of time in the writings of Isaac Asimov Samuel Taylor Coleridge Fyodor M Dostoevsky Francesco Petrarch and numerous other authors Includes the contributions of naturalists philosophers physicists theologians astronomers anthropologists geologists paleontologists and psychologists Includes artists portrayals of the fluidity of time including painter Salvador Dali's *The Persistence of Memory* and *The Discovery of America* by Christopher Columbus and writers Gustave Flaubert's *The Temptation of Saint Anthony* and Henryk Sienkiewicz's *Quo Vadis* Provides a truly interdisciplinary approach with discussions of Aztec Buddhist Christian Egyptian Ethiopian Islamic Hindu Navajo and many other cultures conceptions of time
