Jasinski, 2008-10-01 Where the Paluxy River now winds through the North Texas Hill Country the great lizards of prehistory once roamed leaving their impressive footprints deep in the limy sludge of what would become the earth s Cretaceous layer It wouldn t be until a summer day in 1909 however when young George Adams went splashing along the creekbed that chance and shifting sediments would reveal these stony traces of an ancient past Young Adams s first discovery of dinosaur tracks in the Paluxy River Valley near the small community of Glen Rose Texas came more than one hundred million years after the reign of the dinosaurs During this prehistoric era herds of lumbering sauropods and tri toed carnivorous theropods made their way along what was then an ancient dinosaur highway Today their long ago footsteps are immortalized in the limestone of the riverbed arousing the curiosity of picnickers and paleontologists alike Indeed nearly a century after their first discovery the stony oddities of Somervell County continue to draw Saturday afternoon tourists renowned scholars and dinosaur enthusiasts from across the nation and around the globe In her careful and colorful history of Dinosaur Valley State Park Jasinski deftly interweaves millennia of geological time with local legend old photographs and quirky anecdotes of the people who have called the valley home Beginning with the valley s first visitors the dinosaurs Jasinski traces the area s history through to the decades of the twentieth century when new track sites continued to be discovered and visitors and locals continued to leave their own material imprint upon the changing landscape The book reaches its culmination in the account of the hard won battle fought by Somervell residents and officials during the

latter decades of the century to secure Dinosaur Valley's preservation as a state park      *Dinosaurs* W. D. Matthew, Palaeontology deals with the History of Life Its time is measured in geologic epochs and periods in millions of years instead of centuries Man by this measure is but a creature of yesterday his forty centuries of civilization 1 but a passing episode It is by no means easy for us to adjust our perspective to the immensely long spaces of time involved in geological evolution We are apt to think of all these extinct animals merely as prehistoric to imagine them all living at the same time and contending with our cave dwelling ancestors for the mastery of the earth In order to understand the place of the Dinosaurs in world history we must first get some idea of the length of geologic periods and the immense space of time separating one extinct fauna from another The Age of Man Prehistoric time as it is commonly understood is the time when barbaric and savage tribes of men inhabited the world but before civilization began and earlier than the written records on which history is based This corresponds roughly to the Pleistocene epoch of geology it is included along with the much shorter time during which civilization has existed in the latest and shortest of the geological periods the Quaternary It was the age of the mammoth and the mastodon the megatherium and Irish deer and of other quadrupeds large and small which are now extinct but most of its animals were the same species as now exist It was marked by the great episode of the Ice Age when considerable parts of the earth's surface were buried under immense accumulations of ice remnants of which are still with us in the icy covering of Greenland and Antarctica      *The Explorer ...* ,1922
