## **The Fallacy Of Social Science Research A Critical Examination And New Qual:**

*The Fallacy of Social Science Research* Pablo González Casanova, 1981      Rethinking Race and Ethnicity in Research Methods John H Stanfield II, 2016-06-03 This collection of original work demonstrates the new ways in which particular research methodologies are used valued and critiqued in the field of race and ethnic studies Contributing authors discuss the ways in which their personal and professional histories and experiences lead them to select and use particular methodologies over the course of their careers They then provide the intellectual histories strengths and weaknesses of these methods as applied to issues of race and ethnicity and discuss the ethical practical and epistemological issues that have influenced and challenged their methodological principles and applications Through these rigorous self examinations this text presents a dynamic example of how scholars engage both research methodologies and issues of social justice and ethics This volume is a successor to Stanfield s landmark *Race and Ethnicity in Research Methods*      Knowledge, Power and Dissent Guy R. Neave, 2006-01-01 This publication is based on the discussions of the 2004 Global Colloquium on Research and Higher Education Policy of the UNESCO Forum for Higher Education Research and Knowledge held in Paris in December 2004 It contains contributions from 17 international experts in the field of higher education which explore the global rise of the knowledge society and its implications for higher education and for sustainable human development in the future      **The Texas-Mexican Conjunto** Manuel Peña, 2010-07-05 Around 1930 a highly popular and distinctive type of accordion music commonly known as conjunto emerged among Texas Mexicans Manuel Pe a s *The Texas Mexican Con unto* is the first comprehensive study of this unique folk style The author s exhaustive fieldwork and personal interviews with performers disc jockeys dance promoters recording company owners and conjunto music lovers provide the crucial connection between an analysis of the music itself and the richness of the culture from which it sprang Using an approach that integrates musicological historical and sociological methods of analysis Pe a traces the development of the conjunto from its tentative beginnings to its preeminence as a full blown style by the early 1960s Biographical sketches of such major early performers as Narciso Mart nez El Hurac n del Valle Santiago Jim nez El Flaco Pedro Ayala Valerio Longoria Tony de la Rosa and Paulino Bernal along with detailed transcriptions of representative compositions illustrate the various phases of conjunto evolution Pe a also probes the vital connection between conjunto s emergence as a powerful symbolic expression and the transformation of Texas Mexican society from a pre industrial folk group to a community with increasingly divergent socioeconomic classes and ideologies Of concern throughout the study is the interplay between ethnicity class and culture and Pe a s use of methods and theories from a variety of scholarly disciplines enables him to tell the story of conjunto in a manner both engaging and enlightening This important study will be of interest to all students of Mexican American culture ethnomusicology and folklore      *Three Latin American Sociologists* Joseph A. Kahl, 2024-12-06 Originally published in 1976 under the title *Modernization Exploitation and Dependency in Latin America* and again in 1988 under the current title the

author describes examines and introduces the life and work of three of the most important figures in the development of comparative politics and political sociology Gino Germani Argentina Pablo Gonzales Casanova Mexico and Fernando Henrique Cardoso Brazil At the time of its first publication the book introduced those three Latin American sociologists to the North American social and political science community However as Peter Evans points out in his introduction the book had not lost its importance in the intervening years Rather the subsequent developments in comparative scholarship have only highlighted the influence of the three Latin Americans The developments in comparative and political social science can virtually only be understood in the light of the influence that the thought of Germani Gonzales Casanova and Cardoso had on the discussions in North America

**Technologies of Knowing** John Willinsky, 2000-02-15 In this age of ever more powerful computers our ability to collect and spread knowledge is growing at an exponential rate Far from liberating humanity our information exasperation as John Willinsky describes it in this pathbreaking book has made our ability to reach conclusions about the world around us all the more difficult With little order to guide us through the mountains of new information in the Internet the public as well the sciences that have amassed such knowledge has little confidence in its potential to change the world for the better For example the overload of conflicting new findings in breast cancer research has so paralyzed progress that some researchers now recommend that women stop examining themselves to avoid the psychological burden of monthly searches for this deadly disease While some critics have condemned computers and the Internet for putting us in this age of overflow and still others have praised them for their own sake Willinsky takes a middle ground Using the fictitious Automata Data Corporation as the vehicle for an ingenious thought experiment he plays out what would happen if all information collected from social science research were centralized catalogued and processed by one company serving the public interest Willinsky describes in great detail how such an entity could work to fulfill the promises of the human sciences and technology Sure to stir debate Technologies of Knowing offers a starting point from which to rethink our understanding of our emerging wired world and adds new insight into how to make the uses of knowledge more democratic

Cultural Capital Lane Ryo Hirabayashi, 2022-04-05 This book shows how Zapotec peasants migrating to Mexico City utilize paisanazgo which prescribes solidarity among people from the same locale as the basis for cooperation and mutual aid within a new environment This study focuses on three groups of Mountain Zapotecs to explain why migrant associations were created and why they took different forms citing regional variations in ethnicity solidarity occupational pursuits and sociopolitical articulation to the nation in the three points of origin

Transfigurations Asbjørn Grønstad, 2008 In many senses viewers have cut their teeth on the violence in American cinema from Anthony Perkins slashing Janet Leigh in the most infamous of shower scenes to the 1970s masterpieces of Martin Scorsese Sam Peckinpah and Francis Ford Coppola to our present day undertakings in imagining global annihilations through terrorism war and alien grudges Transfigurations brings our cultural obsession with film violence into a renewed dialogue with contemporary theory Gr nstad argues that the

use of violence in Hollywood films should be understood semiotically rather than viewed realistically. Transfigurations thus alters both our methodology of reading violence in films and the meanings we assign to them depicting violence not as a self contained incident but as a convoluted network of our own cultural ideologies and beliefs. *White Logic, White Methods* Tukufu Zuberi, Eduardo Bonilla-Silva, 2008-05-02 Examines how the racial lenses of the social sciences and the subscription of social scientists to whites racial common sense have limited their understanding of racial matters and handicapped their capacity to appreciate the significance of the race effect they call it the racial stratification effect. With an assemblage of leading scholars *White Logic White Methods* explores the possibilities and necessary dethroning of current social research practices and demands a complete overhaul of current methods towards a multicultural and pluralist approach to what we know think and question. Readers in various social sciences will find useful the chapters in the collection but all will agree that the introductory and concluding chapters to the volume *Towards a Definition of White Logic and White Methods* and *Telling the Real Tale of the Hunt Towards a Race Conscious Sociology of Racial Stratification* are likely to become classics in the field of racial and ethnic relations. *The Use and Abuse of Social Science* Frank A. Heller, 1986 Expectations about the use of social science research vary from the near euphoric to the downright cynical. *The Use and Abuse of Social Science* looks at the outcomes of such research in order to give a realistic appraisal of what our expectations should be. The authors describe a number of successful and unsuccessful applications of social science research and highlight some outright abuses. Within a realistic framework they provide impressive arguments and supporting data to show that social science research can lead to important developments in policy and to changes in practice. Their evidence also demonstrates that there are many equally valid research philosophies and methods. The authors come from a wide variety of disciplines including systems science economics criminology sociology political science organizational studies psychology and government administration. Their experience covers the United States France Germany Great Britain Sweden the Netherlands and Australia. **Journal of Economic Literature**, 1982. *Subject Catalog* Library of Congress, **Focus on Quality** Berndine F. Nel, Ratnamala Singh, 1985. *Qualitative Planning Methodology* Kenneth E. Corey, 1985. *Beyond the Case* Corey M. Abramson, Neil Gong, 2020 The social sciences have seen a substantial increase in comparative and multi sited ethnographic projects over the last three decades. Yet at present researchers seeking to design comparative field projects have few scholarly works detailing how comparison is conducted in divergent ethnographic approaches. In *Beyond the Case* Corey M. Abramson and Neil Gong have gathered together several experts in field research to address these issues by showing how practitioners employing contemporary iterations of ethnographic traditions such as phenomenology grounded theory positivism and interpretivism use comparison in their works. The contributors connect the long history of comparative and anti comparative ethnographic approaches to their contemporary uses. By honing in on how ethnographers render sites groups or cases analytically commensurable and comparable *Beyond the Case* offers a new lens for examining the assumptions payoffs and

potential drawbacks of different forms of comparative ethnography      *Subject Catalog, 1981* Library of Congress, 1981
