Raftis, 1996-11-18 Offering a revisionist theory that shifts the focus from labour services required by the lord to capital required by the customary tenant Raftis reveals that peasant economic development and manorial economy are not mutually exclusive terms Using account rolls charters court rolls and lay subsidy rolls he demonstrates that lords subordinated their power to tax and to extract labour services to a policy of capital maintenance This breakthrough allows him to develop a more rational explanation for the growth of markets and wealth in a countryside not exclusively dependent on the economy of lords Peasant Economic Development within the English Manorial System is a ground breaking analysis that redefines the social and economic history of rural medieval England and changes the direction of medieval scholarship The English Peasantry and the

His literary style is both accessible and scholarly creating a rich tapestry of narratives that highlight the struggles of the peasantry while situating their experiences within the broader context of industrialization and agrarian capitalism Slater an influential historian whose work often focused on rural society and labor issues was deeply aware of the tensions between tradition and modernity in England His scholarly interests likely stemmed from his background in social history coupled with a passionate commitment to understanding the plight of the working class This perspective enriches the text as Slater not only recounts the historical events but also captures the emotional and psychological impact of these changes on peasant lives This compelling work is essential reading for anyone interested in agrarian history social justice and the development of modern British society Slater's thorough research and gripping narrative make it a notable contribution to the discourse on land rights and rural identity offering valuable lessons for contemporary discussions on community and ownership
