Robertson, 2012-10-16 What makes a winner Why do some people succeed both in life and in business and others fail Why do a few individuals end up supremely powerful while many remain powerless The winner effect is a term used in biology to describe how an animal that has won a few fights against weak opponents is much more likely to win later bouts against stronger contenders As Ian Robertson reveals it applies to humans too Success changes the chemistry of the brain making you more focused smarter more confident and more aggressive The effect is as strong as any drug And the more you win the more you will go on to win But the downside is that winning can become physically addictive By understanding what the mental and physical changes are that take place in the brain of a winner how they happen and why they affect some people more than others Robertson answers the question of why some people attain and then handle success better than others He explains what makes a winner or a loser and how we can use the answers to these questions to understand better the behavior of our business colleagues family friends and ourselves *Cyberwarfare: Information Operations in a Connected World* Mike Chapple, David Seidl, 2021-10-11 Cyberwarfare Information Operations in a Connected World puts students on the real world battlefield of cyberspace It reviews the role that cyberwarfare plays in modern military operations operations in which it has become almost impossible to separate cyberwarfare from traditional warfare **Emergency War Plan** Sean M. Maloney, 2021-02 2023 AFHF Air Power History Book Prize Winner Emergency War Plan examines the theory and practice of American nuclear deterrence and its evolution during the Cold War Previous examinations of nuclear strategy during this time have for the most part categorized American efforts as massive retaliation and mutually assured destruction blunt instruments to be casually dismissed in favor of more flexible approaches or summed up in inflammatory and judgmental terms like MAD These descriptors evolved into slogans and any nuanced discussion of the efficacy of the actual strategies withered due to a variety of political and social factors Drawing on newly released weapons effects information along with new information about Soviet capabilities as well as risky and covert espionage missions Emergency War Plan provides a completely new examination of American nuclear deterrence strategy during the first fifteen years of the Cold War

the first such study since the 1980s Ultimately what emerges is a picture of a gargantuan and potentially devastating enterprise that was understood at the time by the public in only the vaguest terms but that was not as out of control as has been alleged and was more nuanced than previously understood

1940-1941- CHRONOLOGY DAY BY DAY Ruben Ygua,2025-08-19 Traditional methods of studying the past have always given greater importance to nationalist religious and moral interests which subordinated the historical fact to the System point of view That s how we have been educated The time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about After so many years of studying History I came to the conclusion that the best study system is through an impartial objective Chronology that just put each event in its exact place in time revealing History without manipulation This Chronology contains not only purely political facts such as the foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on In parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the religion of each civilization inventions or discoveries that cannot be placed in an exact date etc The result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences This is something that traditional history has generally ignored when it was not usable A work of this magnitude could not be published in a single book so I have divided it into several collections and the Spanish originals are being translated into French English Italian and Portuguese The chronology goes from prehistory to the present day year by year as far as possible For those who prefer a deeper and more detailed study I have prepared a second chronology day by day this for now covers from 1789 to 1946 divided into five collections

The Life of a Spy Rod Barton, 2021-05-04 I was no James Bond with a licence to kill but I worked with the British intelligence services and with and for the CIA I had guns pointed at me death threats issued a price placed on my head In 1971 Rod Barton applied for a junior scientist role in the Australian Department of Defence Little did he know what it entailed as the Cold War intensified Barton was inducted into the murky world of espionage For the next few decades Barton lived a life straight from an adventure novel In war torn Mogadishu he disarmed militia while sleeping in rat infested barracks As a UN weapons inspector he flew to Baghdad on special missions interviewing top scientists to uncover an illegal weapons program and raced across Europe tracking materials sold to the Iraqis After the disastrous 2003 invasion of Iraq the CIA engaged him as its special adviser in the hunt for Iraq's weapons of mass destruction But he soon clashed with the agency over what he saw and what he didn't find It prompted him to step from the shadows and share the truth with the world and to tussle with the Australian government This is an extraordinary behind the scenes account of a world marked by risk secrecy and individual acts of courage Written with passion humour and candour *The Life of a Spy* will introduce you to a man of principle in a time of chaos and take you to the frontlines of politics and war No Australian intelligence officer in recent times has been closer to the centre of world affairs than Barton or better placed to observe the intense political pressures applied from all sides on
