The Enlightenment And Science In Eighteenth Century France:

Science and the Enlightenment Thomas L. Hankins, 1985-04-26 This book is a general history of eighteenth century developments in physical and life sciences **The Enlightenment and Science in Eighteenth-century France** Colm Kiernan, 1973 The Oxford University Studies in the Enlightenment series previously known as SVEC Studies on Voltaire and the Eighteenth Century has published over 500 peer reviewed scholarly volumes since 1955 as part of the Voltaire Foundation at the University of Oxford International in focus Oxford University Studies in the Enlightenment volumes cover wide ranging aspects of the eighteenth century and the Enlightenment from gender studies to political theory and from economics to visual arts and music and are published in English or French Botanophilia in Eighteenth-Century France R.L. Williams, 2001-10-31 The book describes the innovations that enabled botany in the Eighteenth century to emerge as an independent science independent from medicine and herbalism This encompassed the development of a reliable system for plant classification and the invention of a nomenclature that could be universally applied and understood The key that enabled Linnaeus to devise his classification system was the discovery of the sexuality of plants The book which is intended for the educated general reader proceeds to illustrate how many aspects of French life were permeated by this revolution in botany between about 1760 to 1815 a botanophilia sometimes inflated into botanomania The reader should emerge with a clearer understanding of what the Enlightenment actually was in contrast to some popular second hand ideas today

The Newton Wars & the Beginning of the French Enlightenment J.B. Shank, 2024-05-31 Nothing is considered more natural than the connection between Isaac Newton s science and the modernity that came into being during the eighteenth century Enlightenment Terms like Newtonianism are routinely taken as synonyms for Enlightenment and modern thought yet the particular conjunction of these terms has a history full of accidents and contingencies Modern physics for example was not the determined result of the rational unfolding of Newton s scientific work in the eighteenth century nor was the Enlightenment the natural and inevitable consequence of Newton s eighteenth century reception Each of these outcomes in fact was a contingent event produced by the particular historical developments of the early eighteenth century A comprehensive study of public culture *The Newton Wars and the Beginning of the French Enlightenment* digs below the surface of the commonplace narratives that link Newton with Enlightenment thought to examine the actual historical changes that brought them together in eighteenth century time and space Drawing on the full range of early modern scientific sources from studied scientific treatises and academic papers to book reviews commentaries and private correspondence J B Shank challenges the widely accepted claim that Isaac Newton s solitary genius is the reason for his iconic status as the father of modern physics and the philosophemovement

Evolutionism in Eighteenth-century French Thought Mary Efron Gregory, 2008 This book examines how eighteenth century French theorists Maillet Montesquieu La Mettrie Buffon Maupertuis Diderot Rousseau and Voltaire addressed evolutionism Each thinker laid down a building block that would eventually open the door to the mutability of species and a departure from the long held belief that the chain of beings is fixed This book describes how the philosophes established a triune relationship among contemporary scientific discoveries random creationism propelled by the motive and conscious properties of matter and the notion of the chain of being along with its corollaries plenitude and continuity Also addressed is the contemporary debate over whether apes could ever be taught to speak as well as the issue of race and the family of man

[Marianne and the Science of the Connoisseur in Eighteenth-Century Europe](#) Kristel Smentek, 2017-07-05 Celebrated connoisseur drawings collector print dealer book publisher and authority on the art of antiquity Pierre Jean Mariette 1694 1774 was a pivotal figure in the eighteenth century European art world Focusing on the trajectory of Mariette s career this book examines the material practices and social networks through which connoisseurs forged the idea of art as an object of empirical and historical analysis Drawing on significant unpublished archival material as well as on histories of science publishing collecting and display this book shows how Mariette and his colleagues practices of classification and interpretation of the graphic arts gave rise to new conceptions of artistic authorship and to a history of art that transcended the biographies of individual artists To follow Mariette s career through the eighteenth century is to see that art was consolidated as a specialized category of intellectual inquiry and that style emerged as its structuring analytic device in the overlapping spaces of the collector s

Reader's Guide to the History of Science Arne

Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn *Companion to the History of Modern Science* G N Cantor, G.N. Cantor, J.R.R. Christie, M.J.S. Hodge, R.C. Olby, 2020-10-07 The 67 chapters of this book describe and analyse the development of Western science from 1500 to the present day Divided into two major sections The Study of the History of Science and Selected Writings in the History of Science the volume describes the methods and problems of research in the field and then applies these techniques to a wide range of fields Areas covered include the Copernican Revolution Genetics Science and Imperialism the History of Anthropology Science and Religion Magic and Science The companion is an indispensable resource for students and professionals in History Philosophy Sociology and the Sciences as well as the History of Science It will also appeal to the general reader interested in an introduction to the subject

Materials in Eighteenth-century Science Ursula Klein, Wolfgang Lefèvre, 2007 In this history of materials the authors link chemical science with chemical technology challenging our current understandings of objects in the history of science and the distinction between scientific and technological objects They further show that chemistry's experimental production and understanding of materials changed over time first in the decades around 1700 and then around 1830 when mundane materials became clearly distinguished from true chemical substances [Lamarckism and the Emergence of 'Scientific' Social Sciences in Nineteenth-Century Britain and France](#) Snait B. Gissis, 2024-04-09 The book presents an original synthesizing framework on the relations between the biological and the social Within these relations the late nineteenth century emergence of social sciences aspiring to be constituted as autonomous as scientific disciplines is described analyzed and explained Through this framework the author points to conceptual and constructive commonalities conjoining significant founding figures Lamarck Spencer Huxley Jackson Ribot Durkheim Freud who were not grouped nor analyzed in this manner before Thus the book offers a rather unique synthesis of the interactions of the social the mental and the evolutionary biological Spencerian Lamarckism and or Neo Lamarckism crystallizing into novel fields It adds substantially to the understanding of the complexities of evolutionary debates during the last quarter of the nineteenth century It will attract the attention of a wide spectrum of specialists academics and postgraduates in European history of the nineteenth century history and philosophy of science and history of biology and of the social sciences including psychology
