## **The Environment At Work:**

**Workspace Strategies** Jacqueline C. Vischer, 2012-12-06 We live in era of transformation of technology of social values and of the way work is done This book represents a timely and innovative addition to current thinking and writing about transformation in organizations In order to meet an increasingly global and competitive environment organizations are undergoing reengineering work process redesign right sizing creating a virtual office and other forms of restructuring and basic change of the way work is accomplished Such transformation means analyzing and redesigning core processes in organizations around new kinds of principles such as total quality and customer service The eventual effect of these changes is likely to be the networked or boundary less organization in which the traditional boundaries between functions and between producers and their suppliers and sometimes even between organizations and their competitors are broken down The goal of such transformation is to make the work of the organization more efficient and productive to produce more with fewer resources and at a lower cost In the conventional view of the transformation process certain secondary concerns such as the need to protect the environment or to help an increasingly heterogeneous work force deal with its personal issues are seen as problematic for this core thrust Some recent work however is beginning to show that if these so called secondary concerns are considered central far from being problematic they actually present strategic opportunities for productive innovation and change

Classical Nucleation Theory in Multicomponent Systems Hanna Vehkamäki,2006-03-22 Nucleation is the initial step of every first order phase transition and most phase transitions encountered both in everyday life and industrial processes are of the first order Using an elegant classical theory based on thermodynamics and kinetics this book provides a fully detailed picture of multi component nucleation As many of the issues concerning multi component nucleation theory have been solved during the last 10 15 years it also thoroughly integrates both fundamental theory with recent advances presented in the literature Classical Nucleation Theory in Multicomponent Systems serves as a textbook for advanced thermodynamics courses as well as an important reference for researchers in the field The main topics covered are the basic relevant thermodynamics and statistical physics modelling a molecular cluster as a spherical liquid droplet predicting the size and composition of the nucleating critical clusters kinetic models for cluster growth and decay calculating

nucleation rates and a full derivation and application of nucleation theorems that can be used to extract microscopic cluster properties from nucleation rate measurements The assumptions and approximations needed to build the classical theory are described in detail and the reasons why the theory fails in certain cases are explained Relevant problems are presented at the end of each chapter

*Beyond Environmental Comfort* Boon Lay Ong, 2013-06-26 *Beyond Environmental Comfort* highlights some of the key ideas that form the foundation of the field of environmental comfort and at the same time gives voice to some of the concerns and considerations on the limitations of the field as it stands today Bringing together a range of foremost thinkers in their respective fields Michel Cabanac Derek Clements Croome Nick Baker Harold Marshall Juhani Pallasmaa Dean Hawkes and Constance Classen this book argues for a deeper appreciation of how environmental comfort may be understood in terms of our relationship with the environment rather than as independent qualities For the first time these diverse views are brought together by Editor Boon Lay Ong to present insights into a world beyond what is normally covered in academic research In the process an attempt is made to define the field for the future This book shows that it is by understanding just how environmental design needs to go beyond mere comfort and deal with well being that we can meaningfully design our future
