## **The Est Experience:**

Self Realization Espy M. Navarro, Robert Navarro, 2002-10-04 Telling the truth is done in a way that is supportive non brutal enlightening and comfortable In general people dont tell the truth because of many reasons mostly because it is usually threatening to do so But if you dont get at the truth which means to see things the way that they really are then you cant possibly discover the truth Werner Erhard This book Self Realization The est and Forum Phenomena in American Society presents a view of the content and context of est the events that took place and a look at the distinct personality of Werner Erhard who added his personal touch to the field of consciousness raising The est organization underwent great change from its beginnings and even now in its present form as the Forum series remains as a subject that is still open to a wide range of vast interpretations It has been described as an organization that has tendencies of being a cult to one of an educational corporation that offers a profound and revealing experience What is a fact is that the collective experiences of over 1 400 000 human beings who have gone through either the est training or the Forum series and each of their particular contributions that have resulted from these experiences have certainly had an impact on America and the world Werner Erhard the founder of these courses is undoubtedly the most famous ex used car salesman in the United States Without any formal credentials degrees or advanced educational training he used his innate intelligence intuition and insight to promote self awareness in the United States In the 1970s he was right for the times in synch with the fledgling me generation By the time that he had retired the est training in 1984 and when he left the Forum in 1991 almost 750 000 people had undergone the courses that he had developed and marketed Werner created the est training from three main sources Mind Dynamics Scientology and Zen Even though these sources contributed greatly to est a lot of credit must be given to Werner Erhard for putting the elements of the est training together in a unique fashion He transformed the subject matter of life from mere words with his stated intent to alter the belief foundation that drives the lives of every human being on the planet In the process he became a trailblazer albeit subject to the arrows that every pioneer becomes a target of from detractors pundits experts and others who did not understand what was being presented For a while Erhard was the poster child of the awareness movement that swept America during the 1970s Eventually through some of his actions but mostly through the hostile environment of the media he succumbed to the slaughter of the relentless and vicious attacks on his character and persona Nevertheless while it was vibrantly alive the est training provided one of the best and quickest opportunities available to radically alter ones life Many competitors emerged but only est had the staying power for as long as it did and which still continues to this day under the Forum series The importance of the est training and the Forum series especially in the United States is in the form of individual contributions that have transformed and enabled the people of this nation to enjoy a new level of spirituality empowerment perception and enhancement of their personal enlivenment and contribution

**Unsnarling the World-Knot** David Ray Griffin,2008-03-25 The mind body problem which Schopenhauer called the world knot has been a central problem for philosophy since the time of Descartes Among realists those who accept the reality of the physical world the two dominant approaches have been dualism and materialism but there is a growing consensus that if we are ever to understand how mind and body are related a radically new approach is required David Ray Griffin develops a third form of realism one that resolves the basic problem common to dualism and materialism of the continued acceptance of the Cartesian view of matter In dialogue with various philosophers including Dennett Kim McGinn Nagel Seager Searle and Strawson Griffin shows that materialist physicalism is even more problematic than dualism He proposes instead a panexperientialist physicalism grounded in the process philosophy of Alfred North Whitehead Answering those who have rejected panpsychism as obviously absurd Griffin argues compellingly that panexperientialism by taking experience and spontaneity as fully natural can finally provide a naturalistic account of the emergence of consciousness an account that also does justice to the freedom we all suppose in practice

Lyles,2024-04-08 For 10 000 years before any European immigrants arrived on the North American Continent Native American Indians engaged in a communal lifestyle From 1600 to 1791 American Colonists established a thriving home production economy and having ownership of their tools or means of production they produced everything they needed to survive They were self reliant and the American Colonists sold their excess goods to merchants who resold them for a profit By 1791 the merchants were able to start the first textile factories as a result which brought an abrupt end to the home production economy and the beginning of American Capitalism Former independent colonists were now forced into the textile factory and the first wage contract appeared in America The wage contract also set in motion a contradiction between the capitalist owners of the means of production and the new American Working Class The wage contract allowed the owners of working class labor and the instruments of production to evolve into an American Ruling Class and the producers of all commodities and wealth became the American Working Class People wage workers class Because of their divergent interests the two classes formed a class contradiction and the latter became known as the capitalist American Ruling Class Opposite and the American Working Class Opposite People wage workers This development occurred mainly in the northern factory economy while in the South uncompensated African Slave Labor was dominant which was owned by an American Slaveholding Class By 1860 the contradiction between the capitalist American Ruling Class Opposite owner of the wage labor system came into a head on contradiction with uncompensated African Slave Labor and a bloody Civil War was fought to determine which type of means of production would prevail and dominate during the 20th Century The South was defeated and the wage contract system became nationalized Therefore throughout the twentieth Century including the beginning of the new Millennium the capitalist American Ruling Class Opposite expropriated the labor s product of the American Working

The Heart of the Internet Jacques Vallee, 2003 Jacques Vallee was among the engineers and visionaries who set up the Internet hoping to connect people not control them through information For a few years it seemed that this dream was being realized But after the dot com crash of 2001 much of the

Web's information flowed into the media giants and corporate conglomerates leaving millions of Net denizens without true freedom of choice. And then there is the threat of government snooping. All is not lost but it is time for public and private actions to rebuild the dream and win back our freedom. In *The Heart of the Internet* Vallee reconstructs the history of computer technology and destroys a few myths. Eniac was not the first computer. Apple did not invent the mouse and neither did Xerox. Uses first person recollections and notes to describe the series of breakthroughs that transformed computers from calculating machines to universal platforms for new media. Describes the Internet in today's marketplace pressured on the one hand by commercial interests seeking to influence not merely our purchases but our thoughts and on the other by governmental obsession to harness the whole system to its own narrow definitions of security sacrificing our privacy and possibly our freedom in the process. States a set of principles for network citizens and suggests how we can create new standards for Internet usage. Book jacket      *The Network Revolution* Jacques Vallee, 1982
