The Etruscans A New Investigation By Christofani Mauro:

The Etruscans Mauro Cristofani, 1979 Dependency and Social Inequality in Pre-Roman Italy Martin Bentz, Patrick Zeidler, 2024-10-21 In the past most studies on Pre Roman societies in Italy 1st millennium BCE focused on the elites their representation and cultural contacts The aim of this volume is to look at dependent and marginalized social groups which are less visible and often even difficult to define slaves servants freedmen captives foreigners athletes women children etc The methodological challenges connected to the study of such heterogeneous and scattered sources are addressed Is the evidence representative enough for defining different forms of dependencies Can we rely on written and pictorial sources or do they only reflect Greek and Roman views and iconographic conventions Which social groups can't be traced in the literary and archaeological record For the investigation of this topic we combined historical and epigraphical studies Greek and Roman literary sources Etruscan inscriptions with material culture studies images sanctuaries necropoleis including anthropological and bioarchaeological methods These new insights open a new chapter in the study of dependency and social inequality in the societies of Pre Roman Italy **How Writing Made Us Human, 3000 BCE to Now** Walter

Stephens, 2023-10-10 A sweeping history of how writing has preserved cultural practices traditions and knowledge throughout human history In *How Writing Made Us Human 3000 BCE to Now* Walter Stephens condenses the massive history of the written word into an accessible engaging narrative The history of writing is not merely a record of technical innovations from hieroglyphics to computers but something far richer a chronicle of emotional engagement with written culture whose long arc intimates why the humanities are crucial to society For five millennia myths and legends provided fascinating explanations for the origins and uses of writing These stories overflowed with enthusiasm about fabled personalities both human and divine and their adventures with capturing speech and preserving memory Stories recounted how and why an ancient Sumerian king a contemporary of Gilgamesh invented the cuneiform writing system or alternatively how the earliest Mesopotamians learned everything from a hybrid man fish For centuries Jews and Christians debated whether Moses or God first wrote the Ten Commandments Throughout history some myths of writing were literary fictions Plato's tale of Atlantis supposedly emerged from a vast Egyptian archive of world history Dante's vision of God as one infinite book inspired Borges's fantasy of the cosmos as a limitless library while the nineteenth century bequeathed Mary Shelley's apocalyptic tale of a world left with innumerable books but only one surviving reader Stephens presents a comprehensive history of the written word and demonstrates how writing has preserved and shaped human life since the Bronze Age These stories their creators and their preservation have inspired wonder and an endless appetite for historical revelation

Warriors into Traders David W. Tandy, 1997-12-12 The eighth century dawned on a Greek world that had remained substantially unchanged during the centuries of stagnation known as the Dark Age This book is a study of the economic and cultural upheaval that shook mainland Greece and the Aegean area in the eighth century and the role that poetry played in

this upheaval Using tools from political and economic anthropology David Tandy argues that between about 800 and 700 B C a great transformation of dominant economic institutions took place involving wrenching adjustments in the way status and wealth were distributed within the Greek communities Tandy explores the economic organization of preindustrial societies both ancient and contemporary to shed light on the Greek experience He argues that the sudden shift in Greek economic formations led to new social behaviors and to new social structures such as the polis itself a by product of economic change Unraveling the dialectic between the material record and epic poetry Tandy shows that the epic tradition mirrored these new social behaviors and that it portrayed the stresses that economic change brought to the ancient Aegean world Tandy brings in comparative evidence from other small scale communities beset by changes spotlighting the specific plight of one community Ascra in Boeotia on whose behalf Hesiod sang his Works and Days The result is a lively moving account of a human dilemma that many centuries later is all too familiar *The A to Z of the Fashion Industry* Francesca

Sterlacci, Joanne Arbuckle, 2009-10-26 The history of clothing begins with the origin of man and fashionable dress can be traced as far back as 25 000 years ago Recent scientific explorations have uncovered graves in northern Russia with skeletons covered in beads made of mammoth ivory that once adorned clothing made of animal skin The Ancient Egyptians Greeks and Romans each made major contributions to fashion s legacy from their textile innovations unique clothing designs and their early use of accessories cosmetics and jewelry During the Middle Ages fashion trends emerged as trade and commerce thrived allowing the merchant class to afford to emulate the fashions worn by royals However it is widely believed that fashion didn t become an industry until the industrial and commercial revolution during the latter part of the 18th century Since then the industry has grown exponentially Today fashion is one of the biggest businesses in the world with hundreds of billions of dollars in turnover and employing tens of millions of workers It is both a profession an industry and in the eyes of many an art *The A to Z of the Fashion Industry* examines the origins and history of this billion dollar industry This is done through a chronology an introductory essay a bibliography and hundreds of cross referenced entries on designers models couture houses significant articles of apparel and fabrics trade unions and the international trade organizations

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen, 2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art

historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic
