constitutions on the phenotype The selection of the phenomena to be discussed and of the photographs to illustrate them is in many cases subjective and arbitrary and is naturally influenced by my interests and the work done in our laboratory The approach to citations is the exact opposite of that usually used in scientific papers Whenever possible the latest and or most comprehensive review has been cited instead of the original publication Thus the reader is encouraged to delve deeper into any question of interest to him or her I am greatly indebted to many colleagues for suggestions and criticism However my special thanks are due to Dr JAMES F CROW Dr TRAUTE M SCHROEDER and Dr CARTER DENNISTON for their courage in reading the entire manuscript I wish to express my gratitude also to the cytogeneticists and editors who have generously permitted the use of published and unpublished photographs
