World Augustine Casiday,2012-08-21 Over the last century unprecedented numbers of Christians from traditionally Orthodox societies migrated around the world Once seen as an oriental or eastern phenomenon Orthodox Christianity is now much more widely dispersed and in many parts of the modern world one need not go far to find an Orthodox community at worship This collection offers a compelling overview of the Orthodox world covering the main regional traditions of Orthodox Christianity and the ways in which they have become global The contributors are drawn from the Orthodox community worldwide and explore a rich selection of key figures and themes The book provides an innovative and illuminating approach

to the subject ideal for students and scholars alike *Letters, Literacy and Literature in Byzantium* Margaret Mullett, 2023-06-09 These studies look at general problems of reading Byzantine literature at literacy practices and the literary process but also at individual texts The past thirty years have seen a revolution in the way Byzantine literature has been viewed no longer is it considered a decadent form of classical literature or a turgid precursor of modern Greek literature There are still prejudices to overcome that there was no literary public or that Byzantium had no drama or humour but Byzantine texts are now read as literature in the social context of literacy and book culture One genre is treated here more fully the letter Derrida said that letters represent all literature In these studies epistolography is examined from the point of view of genre of originality of communication and as evidence for political history Other genres touched on include the novel historiography parainesis panegyric and hagiography The section on literary process includes essays on genre patronage and rhetoric and the section on literacy practices deals with both writing and reading The collection includes one unpublished lecture which acts as introduction and additional notes and comments *The Philokalia* Brock

Bingaman, Bradley Nassif, 2012-06-26 The Philokalia literally love of the beautiful or good is after the Bible the most influential source of spiritual tradition within the Orthodox Church First published in Greek in 1782 by St Nicodemos of the Holy Mountain and St Macarios of Corinth the Philokalia includes works by thirty six influential Orthodox authors from the fourth to fifteenth centuries such as Maximus the Confessor Peter of Damascus Symeon the New Theologian and Gregory Palamas Surprisingly this important collection of theological and spiritual writings has received little scholarly attention With the growing interest in Orthodox theology the need for a substantive resource for philokalic studies has become increasingly evident The purpose of the present volume is to remedy that lack by providing an ecumenical collection of scholarly essays on the Philokalia that will introduce readers to its background motifs authors and relevance for contemporary life and thought

Byzantine Monastic Foundation Documents John Philip Thomas, Angela Constantinides Hero, Giles Constable, 2000 The nature of the *typkia* discussed by John Thomas in the introduction was one of flexible and personal documents which differed considerably in form length and content Not all of them were foundation documents in the strict sense since they could be issued at any time in the history of an institution Some were wills others were reform decrees and rules yet others were primarily liturgical in character
