**Tyranny** Torbjörn Johannson, 2023-08-29 In 1933 a group of theological students in Berlin asked Dietrich Bonhoeffer and Hermann Sasse to work together with other theologians to come up with a confession that could be used to challenge Nazi ideology and its inroads into the church bodies of Germany through the so-called German Christians who wanted to reshape Christianity into a worship of German ethnicity. The result was the August Bethel Confession named after the town in which Sasse and Bonhoeffer worked together. Unfortunately, church bureaucrats got a hold of it and watered it down, and then it was forgotten for the Barmen Declaration, which was much more heavily influenced by Reformed theology and concerns and failed to even take up the question of what place Jews had in the church. This was a huge disappointment to both Bonhoeffer and Sasse, who are largely regarded as two of the greatest Lutheran theologians of that era. In *Faith in the Face of Tyranny*, Torbjörn Johannson takes a look at the work that both these men brought to the forgotten Bethel Confession to show just what a confessional response to national socialism and racism looks like. Today there are often calls for new confessions and declarations addressing different political ideologies and issues, as well as cultural movements. This book shows what such a confession should look like and why, as well as what considerations should be taken into account when looking at such a project.

**Creation and Contemplation** Julien Decharneux, 2023-06-06 In *Creation and Contemplation*, Julien Decharneux explores the connections between the cosmology of the Qur'an and various cosmological traditions of Late Antiquity, with a focus on Syriac Christianity. The first part of the book studies how, in exhorting its audience to contemplate the world, the Qur'an carries on a tradition of natural contemplation that had developed throughout Late Antiquity in the Christian world. In this regard, the analysis suggests particularly striking connections with the mystical and ascetic literature of the Church of the East, which was in effervescence at the time of the emergence of Islam. The second part argues that the Qur'anic cosmological discourse is built so as to serve the overarching theological message of the text, namely God's absolute unity. Despite the allusive and sometimes obscure way in which the Qur'an talks about the world's coming into being and its maintenance in existence, the text betrays its authors' acquaintance with cosmological debates of Late Antiquity. In studying the Qur'an through the prism of Late Antiquity, this book contributes to our understanding of the emergence of Islam and its relationship with other religious traditions of the time. Winner of the 2022 Marie Antoinette Van Huele Prize and the 2023 Richard Kreglinger Prize, both Faculty of Philosophy and Social Sciences, Free University of Brussels.

**Creation Made Free** Thomas Jay Oord, 2010-01-01 Open Theology offers an advantageous framework for engaging the sciences. With its emphasis upon creaturely freedom, relationality, realist epistemology, and love, Open Theology makes a fruitful dialogue partner with leading fields and theories in contemporary science. In *Creation Made Free*, leading proponents of open theism explore natural and social scientific dimensions of reality as these dimensions both inform and are informed by Open Theology. Important themes addressed include evolution, creation ex nihilo, emergence theory, biblical cosmology, cognitive linguistics, quantum theory, and forgiveness.

Gmirkin, 2022-05-02 Plato's Timaeus and the Biblical Creation Accounts argues that the creation of the world in Genesis 1 and the story of the first humans in Genesis 2 3 both draw directly on Plato's famous account of the origins of the universe

mortal life and evil containing equal parts science theology and myth This book is the first to systematically compare biblical Ancient Near Eastern and Greek creation accounts and to show that Genesis 1-3 is heavily indebted to Plato's Timaeus and other cosmogonies by Greek natural philosophers It argues that the idea of a monotheistic cosmic god was first introduced in Genesis 1 under the influence of Plato's philosophy and that this cosmic Creator was originally distinct from the lesser terrestrial gods including Yahweh who appear elsewhere in Genesis It shows the use of Plato's Critias the sequel to Timaeus in the stories about the Garden of Eden the intermarriage of the sons of God and the daughters of men and the biblical flood This book confirms the late date and Hellenistic background of Genesis 1-11 drawing on Plato's writings and other Greek sources found at the Great Library of Alexandria This study provides a fascinating approach to Genesis that will interest students and scholars in both biblical and classical studies philosophy and creation narratives
