Contemporary France D. L. Hanley,A. P. Kerr, Miss A P Kerr,N. H. Waites,2005-08-17 Many recent studies of French politics have tended to concentrate on the French political system in isolation Contemporary France aims to set the working of the French political system into its historical social and economic context The first section gives a succinct description of the main developments since 1944 in all major contexts economy society domestic politics and foreign relations The authors then analyse the economic social and cultural structures of present day France and discuss the institutional framework of decision making and the major political forces involved in it There are also chapters on French external and defence policy and on the education system all of which are set in the context of the political system as a whole Aimed primarily at students of European history and politics or of French society and culture the book assumes little knowledge in the social sciences and will be readily accessible to beginners in this field
