The Failure of Socialism in South Korea Yunjong Kim, 2015-07-03 Despite the fact that socialist parties have proved to be a major political force across the world this has not been the case in Asian countries Socialism in South Korea is a quintessential example of this failure Despite the existence of a socialist party and what would seem to be the right conditions for development the Korean socialist tendency has failed to become a meaningful force in politics This book explores why and under what conditions Korean socialism has failed to develop into a social democrat movement in the post war period Within the context of the integration of structural and agency factors it goes beyond the generally accepted view that the left failed because of suppression by the state and proffers that the real reason why socialism failed lay with its inability to develop beyond revolutionary socialism and build a more pragmatic social democracy that could develop a broad alliance within Korean society Also drawing on examples from Western Europe and Latin America where left wing forces have achieved power this book will be of huge interest not only to students and scholars of Asian and Korean politics but also socialism comparative and international politics alike

South Korea Since 1980 Uk Heo, Terence Roehrig, 2010-06-28 This book examines the changes in politics economics society and foreign policy in South Korea since 1980 Starting with a brief description of its history leading up to 1980 this book deals with South Korea's transition to democracy the stunning economic development achieved since the 1960s the 1997 financial crisis and the economic reforms

that followed and concludes with the North Korean nuclear crisis and foreign relations with regional powers The theoretical framework of this book addresses how democratization affected all of these dimensions of South Korea For instance democratization allowed for the more frequent alternation of political elites from conservative to liberal and back to conservative These elites initiated different policies for dealing with North Korea and held different views on South Korea's role in its alliance with the United States Consequently ideological divides in South Korean politics became more stark and the political process more combative

Contentious Activism and Inter-Korean Relations Danielle L. Chubb, 2014-02-04 In South Korea the contentious debate over relations with the North transcends traditional considerations of physical and economic security and political activists play a critical role in shaping the discussion of these issues as they pursue the separate yet connected agendas of democracy human rights and unification Providing international observers with a better understanding of policymakers management of inter Korean relations Danielle L Chubb traces the development of various policy disputes and perspectives from the 1970s through South Korea's democratic transition Focusing on four case studies the 1980 Kwangju uprising the June 1987 uprising the move toward democracy in the 1990s and the decade of progressive government that began with the election of Kim Dae Jung in 1997 she tracks activists complex views on reunification along with the rise and fall of more radical voices encouraging the adoption of a North Korean style form of socialism While these specific arguments have dissipated over the years their vestiges can still be found in recent discussions over how to engage with North Korea and bring security and peace to the peninsula Extending beyond the South Korean example this examination shows how the historical trajectory of norms and beliefs can have a significant effect on a state's threat perception and security policy It also reveals how political activists in their role as discursive agents play an important part in the creation of the norms and beliefs directing public debate over a state's approach to the ethical and practical demands of its foreign policy

State-Directed Development Atul Kohli, 2004-08-30 Why have some developing country states been more successful at facilitating industrialization than others An answer to this question is developed by focusing both on patterns of state construction and intervention aimed at promoting industrialization Four countries are analyzed in detail South Korea Brazil India and Nigeria over the twentieth century The states in these countries varied from cohesive capitalist mainly in Korea through fragmented multiclass mainly in India to neo patrimonial mainly in Nigeria It is argued that cohesive

capitalist states have been most effective at promoting industrialization and neo patrimonial states the least The performance of fragmented multiclass states falls somewhere in the middle After explaining in detail as to why this should be so the study traces the origins of these different state types historically emphasizing the role of different types of colonialisms in the process of state construction in the developing world South Korean Politics Koon Woo Nam,1989-12-18 This book describes the process of South Korea s search for a stable political system and analyzes the various factors that contributed to the failure of the successive Seoul regimes to legitimize themselves and institutionalize the structures they had erected
