The Fall Of Worlds:

The Rise and Fall of World Orders Torbjørn L. Knutsen, 1999 Drawing in lessons from 400 years of Great Power politics this volume challenges both the declinist arguments and the overstretched hypothesis of Paul Kennedy to develop an alternative approach to the debate on the rise and fall of the Great Powers The first half of the book compares the Spanish Dutch and the First and Second British world orders It identifies their common features in order to find the most salient causes for their rise as world powers and the most probable reasons for their decline The second half of the book addresses the American world order in the 20th century from Pax Americana to the End of US Hegemony The author sees the dissolution of the Soviet Union and the resurgence of the US as evidence of the role played by normative dimensions commonly underestimated in International Relations analysis Theoretically challenging Knutsen's volume provides a fresh approach to debates in international relations aimed at both students and scholars

The Fall of the Roman World and the Rise of Christianity Kelly Roscoe, 2017-07-15 Although once regarded as a time of uninterrupted ignorance superstition and social oppression the Middle Ages are now understood as a dynamic period during which the idea of Europe as a distinct cultural unit emerged This book dives into late antiquity and the early Middle Ages a time when political social economic and cultural structures were profoundly reorganized As Roman imperial traditions gave way to those of the Germanic peoples who established kingdoms in the former Western Empire new forms of political leadership were introduced and the population of Europe was gradually Christianized

The Fall of France in the Second World War Richard Carswell, 2019-02-01 This book examines how the fall of France in the Second World War has been recorded by historians and remembered within society It argues that explanations of the fall have usually revolved around the four main themes of decadence failure constraint and contingency It shows that the dominant explanation claimed for many years that the fall was the inevitable consequence of a society grown rotten in the inter war period This view has been largely replaced among academic historians by a consensus which distinguishes between the military defeat and the political demise of the Third Republic It emphasizes the contingent factors that led to the military defeat At the same time it seeks to understand the constraints within which France's policy makers were required to act and the reasons for their policy making failures in economics defence and diplomacy

The Worlds of Petrarch Giuseppe Mazzotta,1993-10-20 At the center of Petrarch s vision announcing a new way of seeing the world was the individual a sense of the self that would one day become the center of modernity as well This self however seemed to be fragmented in Petrarch s work divided among the worlds of philosophy faith and love of the classics politics art and religion of Italy France Greece and Rome In recent decades scholars have explored each of these worlds in depth In this work Giuseppe Mazzotta shows for the first time how all these fragmentary explorations relate to each other how these separate worlds are part of a common vision Written in a clear and passionate style *The Worlds of Petrarch* takes us into the politics of culture the poetic imagination into history and ethics art and music rhetoric and theology With this encyclopedic strategy Mazzotta is able to demonstrate that the self for Petrarch is not a unified whole but a unity of parts and at the same time that culture emerges not from a consensus but from a conflict of ideas produced by opposition and dark passion These conflicts intrinsic to Petrarch s style of thought lead Mazzotta to a powerful rethinking of the concepts of fragments and unity and finally to a new understanding of the relationship between them

The Mystery and the World Maria Clara Bingemer, 2016-05-10 During the past century an enormous effervescence of events changed the sociopolitical configuration of the world The interpretation of these facts helped further deepen the crisis in which modern thought already found itself and it generated the uncertain and unstable environment in which we live today the so called postmodernity late modernity or hypermodernity In this context one of the most profound impacts is most certainly the one on religion During the twentieth century religion proved not to be banished from the human horizon as the masters of suspicion intended Known as the godless century the twentieth century saw also a resuscitation of the search for the sense of life and spirituality With the crisis of modern reason humankind turned

toward consumerism and provisional and light practices The last century represents not only the height of the postmodernization process but also the rescue of the transcendent and absolute even if it is an absolute without face and identity It is in this scenario that religious experiences apparently exiled by modern rationality begin to occur and multiply again Mystical experiences will be then the basis for highlighting recurrent characteristics with universal import But they will show a different configuration than before One will be able to find them not in so called sacred spaces but in very secular ones not so much within institutions but at the borders or even outside them not configured by a specific tradition but in an interface that makes more than one tradition meet and dialogue
