The Development of Iron Chelators for Clinical Use

Raymond J. Bergeron, Gary M. Brittenham, 1993-12-06 Representing an integration of basic and clinical sciences this book focuses on new concepts in the design synthesis and testing of iron chelators for clinical application It provides an overview of the pathophysiology of iron metabolism as it relates to the origins of iron mediated tissue damage and it clearly outlines successes and shortcomings of current iron chelation therapy in preventing such damage The book also describes a number of other exciting potential therapeutic applications of iron chelators such as in the treatment of malaria Other topics covered include iron coordination chemistry recent advances in synthetic methods for accessing iron chelators siderophore models subcellular iron storage targets and the possible application of biotechnology in the production of therapeutically useful iron chelators The book also describes new animal models for evaluating chelators

Molecular and Cellular Iron Transport

Douglas Templeton, 2002-01-23 This text analyzes the molecular mechanisms chemical behaviour and regulation of iron transport in biological systems and offers novel methods for the assessment of iron transport across biological membranes It details the characteristics and consequences of iron deficiency and excess to prevent diseases affecting major organ structures and promote bodily iron homeostasis

Iron Chelation Therapy

Chaim Hershko, 2012-12-06 Within the last

few years iron research has yielded exciting new insights into the understanding of normal iron homeostasis However normal iron physiology offers little protection from the toxic effects of pathological iron accumulation because nature did not equip us with effective mechanisms of iron excretion Excess iron may be effectively removed by phlebotomy in hereditary hemochromatosis but this method cannot be applied to chronic anemias associated with iron overload In these diseases iron chelating therapy is the only method available for preventing early death caused mainly by myocardial and hepatic iron toxicity Iron chelating therapy has changed the quality of life and life expectancy of thalassemic patients However the high cost and rigorous requirements of deferoxamine therapy and the significant toxicity of deferiprone underline the need for the continued development of new and improved orally effective iron chelators Such development and the evolution of improved strategies of iron chelating therapy require better understanding of the pathophysiology of iron toxicity and the mechanism of action of iron chelating drugs The timeliness of the present volume is underlined by several significant developments in recent years New insights have been gained into the molecular basis of aberrant iron handling in hereditary disorders and the pathophysiology of iron overload Chapters 1 5

Turning Blood Red: The Fight For Life In Cooley's Anemia Arthur Bank, 2008-11-28 This book is the story of an inherited blood disease

Cooley's anemia or beta thalassemia Cooley's anemia is a severe and potentially fatal anemia that affects millions of people

worldwide Written by a world recognized expert on the disease who has contributed greatly to the scientific understanding of the pathophysiology of this human hemoglobin disorder the book describes the emotional and medical impact of the disease on patients and their families It also summarizes the research on the disease at the level of the genes DNA RNA and proteins In addition it also includes chapters on current therapy and future approaches to the disease such as gene therapy stem cell transplantation and antenatal diagnosis A multidisciplinary book covering the fields of hematology pediatrics medicine genetics and molecular biology the book details how Cooley s anemia serves as a model for understanding other human genetic and acquired diseases such as cancer neurological disorders and heart disease It also provides new insights which may lead to new therapies National Institutes of Health Research Grants ,1990 The Drug Trial Miriam Shuchman,2005 Winner of the Writers Trust of Canada s Shaughnessy Cohen Prize for Political Writing and the Canadian Science Writers Association s Science in Society Book Award Poison pen letters possible medical misconduct and a swirl of competing accusations that led to two inquiries the Olivieri affair ended careers and shook the international research establishment A riveting anatomy of Canada s most controversial drug trial by the medical journalist who helped break the story In August 1998 a medical scandal erupted in the national and international media whose consequences still reverberate A charismatic young doctor named Nancy Olivieri working with young people who suffered from a rare blood disorder stated that she had discovered serious problems with an experimental drug manufactured by Canada s largest drug company Apotex Though her research contract required her to remain silent she decided she had no choice but to warn the patients enrolled in her trials Apotex retaliated by cancelling her research and slamming her reputation In the aftermath Olivieri became a whistleblower applauded in academia and the media for standing up to powerful corporate interests The Olivieri affair spawned two inquiries and multiple lawsuits but the full story of Canada s biggest science scandal has never been told until now In the hands of psychiatrist and medical journalist Miriam Shuchman the debacle over the pill called L1 is revealed as a modern morality play in which every crack in the system of scientific research corporate financing and peer review stands out in stark relief By talking with the people whom both Olivieri and Apotex wanted to heal the young men and women struggling to have normal lives despite debilitating treatment Shuchman also brings us the moving story of the toll on patients health when battles break out among the physicians and researchers aiming to heal them **Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for Fiscal Year 1991** United States.
