The Connoisseur, 1972 *Surrealists in New York: Atelier 17 and the Birth of Abstract Expressionism* Charles Darwent, 2023-05-02 An absorbing group biography revealing how exiles from war torn France brought surrealism to America sparking the movement that became abstract expressionism In 1957 the American artist Robert Motherwell made an unexpected claim I have only known two painting milieus well the Parisian Surrealists with whom I began painting seriously in New York in 1940 and the native movement that has come to be known as abstract expressionism but which genetically would have been more properly called abstract surrealism Motherwell's bold assertion that abstract expressionism was neither new nor local but born of a brief liaison between America and France verged on the controversial Surrealists in New York tells the story of this liaison and the European exiles who brought Surrealism with them an artistic exchange between the Old World and the New centering on taciturn printmaker Stanley William Hayter and the legendary Atelier 17 print studio he founded Here artists experiments literally pushed the boundaries of modern art It was in Hayter's studio that Jackson Pollock found the balance of freedom and control that would culminate in his distinctive drip paintings The impact of Max Ernst Andr Masson Louise Bourgeois and other noted migrants on the work of Motherwell Pollock Mark Rothko and the American avant garde has for too long been quietly written out of art history Drawing on first hand documents interviews and archive materials Charles Darwent brings to life the events and personalities from this crucial encounter revealing a fascinating new perspective on the history of the art of the twentieth century

How Blind is the Watchmaker? Neil Broom, 2019-01-15 First published in 1998 this book shows that modern materialistic science for all its ability to analyse in truly impressive detail the workings of the living world remains powerless to explain the phenomenon of life itself Drawing on a variety of examples from experience of the biological world as a practising scientist the author shows that the qualities of purpose intentionality and mind suffuse almost every aspect of the living realm yet these same qualities remain totally unaccounted for by science itself The author argues that the all too common humanistic dismissal of these crucial components of reality undermines the integrity of science itself and is intellectually perverse He argues that scientific materialism despite its enormous influence in shaping today's high tech world actually presents a gross trivialization of the concept of life Further while unable of itself to provide ultimate answers to the mystery of life this science uncovers facts that point beyond these to a transcendent theistic dimension or in the words of the title to a Watchmaker who indeed is not blind

The Collection of First Editions of American Authors Formed by the Late Arthur Swann Arthur Swann, 1959 **The Hand of the Engraver** Hans-Jörg Rheinberger, 2018-11-30 This book is the first to explore in detail the encounter between Albert Flocon and Gaston Bachelard in postwar Paris Bachelard was a philosopher and historian of science who was also involved in literary studies and poetics Flocon was a student of the Bauhaus in Dessau Germany who specialized in copper engraving Both deeply ingrained in the surrealist avant garde movements each acted at the frontiers of their respective matters in exploring uncharted territory Bachelard experienced the sciences of his time as constantly undergoing radical changes and he wanted to create a historical epistemology that would live up to this experience He saw the elementary gesture of the copper engraver the hand of the engraver as meeting the challenge of resistant and resilient matter in an exemplary fashion Flocon was fascinated by Bachelard's unconventional approach to the sciences and his poetics Together their relationship interrogated and celebrated the interplay of hand and matter as it occurs in poetic writing in the art of engraving and in scientific experimentation In the form of a double biography Hans Jörg Rheinberger succeeds in writing a lucid intellectual history and at the same time presents a fascinating illustrated reading of Flocon's copper engravings **The Art Alliance Bulletin**, 1959 *Dictionary Catalog and Shelf List of the Spencer Collection of Illustrated Books and Manuscripts and Fine Bindings* New York Public Library. Spencer Collection, New York Public Library. Research Libraries, 1971
