**A Theory of Local Entrepreneurship in the Knowledge Economy**

Pierre-André Julien, 2008-01-01

The principal audience for this book seems to be deliberately and most certainly an academic one that said those practitioners from a business management or central local government support agency background might also find the text a useful resource

Intrinsically those employed teaching and researching within the fields of entrepreneurship or regional economic development will find this publication an invaluable and indispensable reference tool

After an excellent cohesive and informative introductory chapter which places the book firmly in the field of regional entrepreneurship theory development the reader is effortlessly prepared for the intellectually challenging read ahead this book is well laid out and it is easy for the reader to pick up the thread of the argument even after a lay off

The endnotes after each chapter are useful and comprehensive adding richness to the text through the additional information

The bibliography is as comprehensive as it is exhaustive

Professor Julien has given us a book that presents both an interesting and alternative perspective to the field of entrepreneurial cross disciplinary research

Paul J Ferri International Journal of Entrepreneurial Behaviour and Research

it is my view that this book gives a very important contribution for the understanding of development of local entrepreneurship through its cross disciplinary approach

I see the book is especially interesting from an entrepreneurship and a regional development perspective

this book should inspire research that takes a more holistic approach using different levels of analysis and applies it to economic development at a local territorial level when studying entrepreneurship

Einar Lier Madsen International Small Business Journal

The reader who is interested in entrepreneurship and or regional development will find this book a welcome contribution to the field

Rainer Harms Entrepreneurship and Innovation

For too long researchers have regarded local dynamism as the result of the actions of certain entrepreneurs

If this were the case how could we explain the simultaneous presence of winning stagnating or declining areas with very similar socioeconomic profiles within the same region

Departing from this restrictive and somewhat inadequate approach Pierre Andr Julien considers entrepreneurship as a collective behaviour specifically related to the dynamism of the milieu in which it develops

The author introduces a complex innovative theory of local entrepreneurship demonstrating that the emergence of new ventures and the development of existing enterprises cannot be understood without taking into account certain factors

locale social capital networking and entrepreneurial culture within a given area are all crucial to entrepreneurial growth

Expanding upon this theory the book demonstrates how entrepreneurship can be fostered in order to support collective development

Various forms of partnership among socioeconomic actors are then analysed to highlight the social conventions and entrepreneurial culture that connect and intensify the energies at the root of local dynamism

This highly original book represents a departure from entrepreneurship literature that is largely limited to the study of entrepreneurs behaviour

Its dynamic presentation of holistic theory will prove an extremely absorbing read for those with an academic or professional

interest in business and management entrepreneurship and regional development **The Entrepreneur's Identity**
