The Environment As I See It Science Is Not Enough:

We Don't Get It! Frank Regan, 2005-09-21 Environmental collapse I hold is going to be the result of our present collective attitudes Regardless of what we believe only when humanity gets an accurate model of reality can we have a sustainable future We Don't Get It uses a collection of short essays that get to the heart of this major dilemma My purpose in writing this book is to clarify some of the most compelling reasons for protecting our environment and to challenge some of our deepest assumptions about our way of life and its effect on our environment in a way that most authors on this subject have not The intended audience for this book is the public as well as both the politicians and the scientists responsible for environmental policy It is a thoughtful examination of our wholesale relationship to our environment and our seeming lack of respect for its absolute primacy Designed to be easily read piecemeal by both the professional and the public I believe this book by its unique and frank approach will appeal to any one who cares about our future **The Environment** Bruce Wallace, 1998 **S. 159, a Bill to Elevate the Environmental Protection Agency to a Cabinet-level Department** United States.
