The Ethnomusicology of Western Art

Music Laudan Nooshin, 2013-10-23 Since the late 1980s the boundaries between the musicologies have become increasingly blurred. Most notably a growing number of musicologists have become interested in the ideas and methodologies of ethnomusicology and in particular in applying one of the central methodological tools of ethnomusicology, ethnography, to the study of Western art music, a tradition which had previously been studied primarily through scores, recordings and other historical sources. Alongside this, since the 1970s a small number of ethnomusicologists have also written about Western art music, thus complicating the idea of ethnomusicology as the study of other music. Indeed, there has been a growth in this area of scholarship in recent years. Approaching Western art music through the perspectives of ethnomusicology can offer new and enriching insights to the study of this musical tradition as shown in the writings presented in this book. The current volume is the first collection of essays on this topic and includes work by authors from a range of musicological and ethnomusicological backgrounds exploring a variety of issues including music in orchestral outreach programmes, new audiences for classical music, concerts, music and conflict, transformation, ethnographic study of the rehearsal process and the politics of a high profile music festival. This book was originally published as a special issue of *Ethnomusicology Forum*. *The Music of the Other* Laurent Aubert, 2007 The great flood of world musics into our immediate cultural environment is not a simple matter of expanding global musical exchange but rather many complex processes such as the growth of intercontinental tourism and the development of technologies in communication. Elegantly tracing the dimensions of these new musical encounters, Laurent Aubert considers the impact of world musics on our values, our habits and our cultural practices. His discussions of key questions about our contemporary music culture widen conventional ethnomusicological perspectives to consider the nature of Western society as a global village and the impact of current Western demands on the future of world musics and their practitioners.

Postmodernism and Globalization in Ethnomusicology Andy H. Nercessian, 2002-03-26 Is the music world clinging to an outdated school of thought in ethnomusicology? Nercessian shows how the theory of cultural relativism continues to detrimentally pervade ethnomusicological thought and then offers a solution that may better serve musical study in today's more globalized world. At the heart of cultural relativism, which seeks to avoid imposing the standards of an outside culture on a work, is the emic/etic dichotomy which delineates the perspective of the outsider and that of the culture of origin. Nercessian points out that in our increasingly globalized society, cultures are no longer separate and distinct. A new theory is necessary to account for the cultural overlap. Borrowing from Derrida, the author offers a new solution that will allow for multiple perspectives without favoring that of the insider or emic. Of importance to students and scholars of ethnomusicology, this book also speaks to other fields of study where cultural relativism continues to dominate.

Modernity, Complex Societies, and the Alphorn Charlotte Vignau, 2013-02-14 *Modernity, Complex Societies, and the Alphorn* provides a fascinating examination of the musical instrument, the alphorn. Alphorn music and its performance. Indeed, it is the first book about this extraordinary instrument to appear in English. It analyses the alphorn phenomenon as a symbol

of the Swiss nation going back to the Swiss nation building process in the nineteenth century and the invention of tradition which began in the second half of the nineteenth century before arriving at important issues of contemporary alphorn practice such as what is tradition How is it being negotiated The insightful and valuable comments from key Swiss alphorn players add to the extensive ethnographic and archival material Departing from this analysis the case studies of Bavaria the Netherlands and Japan shed a light on the issues of worldwide migration of alphorn practice in the modern world as well as on the diverse concepts of a Swiss imagery Intellectually sophisticated yet easily accessible the book ends with an exploration of how to use video and film for musical ethnography considering the practical issues of filmmaking as well as the theoretical implications of shooting and editing for an ethnomusicological film Drawing from the alphorn film as a sample this book covers the entire filmmaking process from the conception of the film to the feedback sessions with the protagonists providing fundamental insights into this technique for ethnomusicologists Based on solid careful and complete research this work will especially appeal to scholars of musicology Swiss history and filmography
