The Europeanization Of Citizenship Between The Ideology Of Nationality Immigration And European Identity:

The Europeanization of Citizenship Fiorella Dell'Olio, 2017-05-15 The connection between immigration and citizenship in Europe is an increasingly important issue This timely and informative book investigates three main aspects of the issue the degree to which European citizenship encourages the development of a European identity the impact of European citizenship at the nation state level in Italy and the UK in regard to domestic policy making in the areas of immigration and citizenship and what is needed to make a supranational citizenship work in practice Fiorella Dell'Olio examines changes in laws on citizenship nationality and immigration in Italy and the UK and assesses the relationship between the political conceptualization of European citizenship and the public response as revealed by opinion polls She argues that the establishment of a European citizenship has reinforced the ideology of nationality in both Italy and the UK and that it consequently has failed to forge a European identity

Creating European Citizens Willem Maas,2007-02-03 Exploring a key aspect of European integration this clear and thoughtful book considers the remarkable experiment with common rights and citizenship in the EU Governments around the world traditionally distinguish insiders citizens from outsiders foreigners Yet over the past half century an extensive set of supranational rights has been created in Europe that removes member governments authority to privilege their own citizens a hallmark of sovereignty The culmination of supranational rights European citizenship not only provides individuals with choices about where to live and work but also forces governments to respect those choices Explaining this innovation why states cede their sovereignty and eradicate or redefine the boundaries of the political community by including foreigners Willem Maas analyzes the development of European citizenship within the larger context of the evolution of rights Imagining more than simply a free trade market the goal of building a broader and deeper community among peoples with a destiny henceforward shared creating European citizens has informed European integration since its origins The author argues that its success or failure will not only determine the future of Europe but will also provide lessons for political integration elsewhere

Reconfiguring Citizenship Mehmoona Moosa-Mitha, 2016-03-23 Citizenship as a status assumes that all those encompassed by the term citizen are included albeit within the boundaries of the nation state Yet citizenship practices can be both inclusionary and exclusionary with far reaching ramifications for both nationals and non nationals This volume explores the concept of citizenship and its practices within particular contexts and nation states to identify whether its claims to inclusivity are justified This will show whether the exclusionary dimensions experienced by some citizens and non citizens are linked to deficiencies in the concept country specific policies or how it is practised in different contexts The interrogation of citizenship is important in a globalising world where crossing borders raises issues of

diversity and how citizenship status is framed This raises the issue of human rights and their protection within the nation state for people whose lifestyles differ from the prevailing ones Besides highlighting the importance of human rights and social justice as integral to citizenship it affirms the role of the nation state in safeguarding these matters It does so by building on Indigenous peoples insights about linking citizenship to connections to other people and the environment and arguing for the inalienability and portability of citizenship rights guaranteed collectively through international level agreements These issues are of particular concern to social workers given that they must act in accordance with the principles of democracy equality and empowerment However citizenship issues are often inadequately articulated in social work theory and practice This book redresses this by providing social workers with insights knowledge values and skills about citizenship practices to enable them to work more effectively with those excluded from enjoying the full rights of citizenship in the nation states in which they reside

Perceptions of Europe Daniel Gaxie, Nicolas Hubé, Jay Rowell, 2013 This book presents the main findings of a comparative qualitative survey conducted in France Germany Italy and Poland Ordinary citizens from very different social backgrounds and professions were asked a range of open ended questions allowing them to express themselves freely There have been few qualitative surveys on ordinary citizens views of European integration and none on this scale The resulting picture is very different from the self evident assumptions of many current studies on European opinions The book stresses the great diversity ambiguity and complexity of European attitudes It emphasises the causal impact of formal education political interest and involvement individual everyday exposures to European realities and

the role of collective national experiences of European integration and national history This book is the first qualitative survey among ordinary from all social strata across Europe that explores perceptions and judgments on Europe and the EU explains the underlying logic of why Europe and European integration are such a far reality to most citizens explores how most citizens are poorly but unequally informed about and interested in European subjects investigates how citizens are able to express perceptions of Europe by using a series of analogies and comparisons often linked to their daily experiences identifies the complex range of issues that influence our perceptions and the irresolute fragmentary mixed and sometimes contradictory nature of these opinions *The Europeanization of National Foreign Policies towards Latin America* Lorena Ruano, 2013-05-07 Who shapes the European Union's policy towards Latin America How has this EU policy modified individual member states relations with the region This book provides a comparative account of seven member states bilateral links with Latin America since 1945 in the context of their EU membership and based on the concept of Europeanization It illustrates how and why the main architects of this EU policy have been Spain and Germany In contrast Poland Sweden and Ireland which had little previous interaction with Latin America have developed their current relations with that region virtually as a result of their EU membership The United Kingdom and France lie in the middle they have been influential in certain policy areas and key periods in history while they have adapted to what is done at the EU level in others Practitioners established academic experts as well emerging scholars in the field bring to bear a novel combination of pioneering research and cutting edge conceptual analysis on this important but neglected area of the EU's foreign relations
