Christos Yannaras Basilio Petra,2019-08-29 Basilio Petra sees Christos Yannaras b 1935 as a philosopher and theologian whose refiguring on the one hand of Heidegger s refusal to define being in ontic terms and on the other of Wittgenstein s willingness to admit the inexpressible character of the mystical has led him to articulate a powerful vision of true human existence This bold interpretation outlines the passage from an ontic mode of nature governed by necessity to a mode of self transcendence and self offering beyond the limitations of decay and death In his native Greece Yannaras revolutionised the way theology had been done for much of the twentieth century This book examines the trajectory of Yannaras thought from his initial encounter with Heidegger s philosophy to his formulation via the tradition of the Greek Fathers of a modern critical ontology It is for both advanced students of philosophy and the growing scholarly audience interested in Yannaras work Written in accessible language that does not compromise intellectual rigour it is the only survey of the development of Yannaras philosophical thought as a whole

The Fellowship of Being John B. O'Malley,2012-12-06 This book is the fruit of a critical inquiry into the nature and scope of Marcel s philosophic achievement As such it is concerned less with affixing the appropriate label personalist or existentialist to Marcel

s thought and with it making it stick than with discovering the precise impulse and tenor of his philosophy. In the process of that more general inquiry the writer found being forced upon him a central concept as integrating focus of Marcel's philosophic investigations. This concept was that of the person. Gradually it emerged as a concept not only of prime importance for understanding the underlying harmony that pervades Marcel's professedly unsystematic researches but equally as one of profound significance for any philosophy that pretends adequately to account for human experience. Furthermore it seemed that the concept derived much of that significance from its acceptance precisely in the context of Marcel's thought. This feature of Marcel's philosophic writings alone is warrant enough for overcoming any initial embarrassment aroused in Anglo-Saxon breasts by his style. For to speak candidly that style is of a generation and a climate whose tastes little accord with palates trained to a greater astringency. Nor will Marcel's evident and unashamed concern with life and its problems necessarily evoke a warm response in minds accustomed to operate in an atmosphere of stricter and more academic reserve.

Theology and the Quest for Truth Mathijs Lamberigts, Lieven Boeve, Terrence Merrigan, 2006

In 2001 three research groups from the field of systematic theology and church history at the Faculty of Theology KU Leuven decided to join forces in an interdisciplinary project entitled *Orthodoxy Process and Product*. The main aim of this project consists of a church historical and systematic theological study of the determination of truth in church and theology. Senior and junior scholars from the three groups agreed to take this theme as the starting point and leading question from which the many research projects they are engaged in could be brought into relationship and as far as possible integrated. Although the question for theological truth already structured the research being conducted in the three groups to a significant degree, joining forces promised the realisation of a surplus value and this both through the gathering of a considerable critical mass in total more than thirty junior and senior researchers and the interdisciplinary design of the project. In this volume a first collection of contributions to this project from a diversity of angles and research subjects is presented. In these contributions scholars from the participating research groups investigate the implications of the overall research question for their particular line of research and research methodologies and suggest how from this specific research the overall question may be refined and elements of answering it can be provided.

On the Future of History Ernst Breisach, 2007-11-01

What does postmodernism mean for the future of history? Can one still write history in postmodernity? To answer questions such as these Ernst Breisach provides the first comprehensive overview of postmodernism and its complex relationship to history and historiography. Placing postmodern theories in their intellectual and historical contexts he shows how they are part of broad developments in Western culture. Breisach sees postmodernism as neither just a fad nor a universal remedy. In clear and concise language he presents and critically evaluates the major views on history held by influential postmodernists such as Derrida, Foucault, Lyotard and the new narrativists. Along the way he introduces to the reader major debates among historians over postmodern theories of evidence, objectivity, meaning and

order truth and the usefulness of history He also discusses new types of history that have emerged as a consequence of postmodernism including cultural history microhistory and new historicism For anyone concerned with the postmodern challenge to history both advocates and critics alike *On the Future of History* will be a welcome guide [Disorder-Specific Psychodrama Therapy in Theory and Practice](#) Reinhard T. Krüger, 2024-01-17 The open access book explains the practical approach in psychodrama with the help of multidisciplinary theories of self development mentalization play and psychosomatic resonance These theories help to structure the therapeutic experiences of Moreno and other psychodramatists and to compare them with experiences and theories of other psychotherapy methods Against this background the author develops models of a disorder specific psychodrama therapy for people with personality disorders borderline organization trauma disorders anxiety disorders obsessive compulsive disorders depression grief reactions suicidal crises masochism psychoses addiction disorders eating disorders and behavioral addictions The therapy models convey a deep understanding of these disorders and sometimes open up new ways of treatment They can be used both in individual and in group therapy The methods are explained with the help of more than 120 case examples The theoretical explanation makes the psychodramatic action methods accessible and applicable to therapists from other schools of therapy as well as in counseling and coaching This makes the practical work therapeutically more effective and creative This is an open access book [Technic and Magic](#) Federico Campagna, 2018-05-31 We take for granted that only certain kind of things exist electrons but not angels passports but not nymphs This is what we understand as reality But in fact reality varies with each era of the world in turn shaping the field of what is possible to do think and imagine Our contemporary age has embraced a troubling and painful form of reality *Technic Under Technic* the foundations of reality begin to crumble shrinking the field of the possible and freezing our lives in an anguished state of paralysis *Technic and Magic* shows that the way out of the present deadlock lies much deeper than debates on politics or economics By drawing from an array of Northern and Southern sources spanning from Heidegger Junger and Stirner's philosophies through Pessoa's poetry to Advaita Vedanta Bhartrhari Ibn Arabi Suhrawardi and Mulla Sadra's theosophies Magic is presented as an alternative system of reality to *Technic* While *Technic* attempts to capture the world through an absolute language Magic centres its reconstruction of the world around the notion of the ineffable that lies at the heart of existence *Technic and Magic* is an original philosophical work and a timely cultural intervention It disturbs our understanding of the structure of reality while restoring it in a new form This is possibly the most radical act if we wish to change our world first we have to change the idea of reality that defines it [The Rainbow of Experiences, Critical Trust, and God](#) Kai-man Kwan, 2011-08-11 The question of whether religious experience can be trusted has been hotly debated in epistemology and philosophy of religion in recent years Kwan surveys this contemporary philosophical debate provides in depth analysis of the crucial issues and offer arguments for an affirmative answer to the above question Kwan first argues against traditional empiricist epistemologies and defends

Swinburne's Principle of Credulity which holds that we should trust our experiences unless there are special considerations to the contrary. The Principle of Credulity is renamed the Principle of Critical Trust to highlight the need for balance between trust and criticism and is used as the foundation for a new approach to epistemology the Critical Trust Approach CTA which maintains an emphasis on experience but attempts to break loose of the straitjacket of traditional empiricism by broadening the evidential base of experience. Kwan then widens his focus by looking at theistic experience in the contemporary multicultural context.

Death, 'Deathlessness' and Existenz in Karl Jaspers' Philosophy Filiz Peach, 2008-01-23. Karl Jaspers is one of the least understood and most neglected major philosophers of the twentieth century and yet his ideas particularly those concerned with death have immense contemporary relevance. Filiz Peach provides a clear explanation of Jaspers' philosophy of existence clarifying and reassessing the concept of death that is central to his thought. For Jaspers a human being is not merely a physical entity but a being with a transcendent aspect and so in some sense deathless. Peach explores this transcendent aspect of humanity and what it is to be deathless in Jaspersian terms. This book is a major contribution to the scarce literature on Jaspers and will be valuable to student and academic alike.

Islam, Modernity and a New Millennium Ali Paya, 2018-02-02. As the world becomes increasingly globalised Islam faces some important choices. Does it seek to modernise in line with the cultures in which it is practised or does it retain its traditions even if they are at odds with the surrounding society? This book utilizes a critical rationalist viewpoint to illuminate many of the hotly contended issues in modern Islam and to offer a fresh analysis. A variety of issues within Islam are discussed in this book including Muslims and modernity, Islam, Christianity and Judaism, approaches to the understanding of the Quran, Muslim identity and civil society, doctrinal certainty and violent radicalism. In each case the author makes use of Karl Popper's theory of critical rationalism to uncover new aspects of these issues and to challenge post-modern relativist, literalist and justificationist readings of Islam. This is a unique perspective on contemporary Islam and as such will be of significant interest to scholars of Religious Studies, Islamic Studies and the Philosophy of Religion.

Benjamin Fondane, a Presentation of His Life and Works John Kenneth Hyde, 1971.

Cautionary Tales in the Ethics of Lifelong Learning Policy and Management Richard G. Bagnall, 2004-05-31. This work is concerned with appraising the contemporary ethical impact of lifelong learning ideology and advocacy on education through focusing on trends in educational policy and management that flow from the ideology. It has its origins in the author's concern that many of those trends are being defined and promoted or opposed without an adequate understanding of their ethical dimensions. The 21 trends examined in this work are seen as defining important dimensions of the quite radical changes in educational policy and management that are flowing from the practical realisation of lifelong learning ideology and advocacy. In here evaluating those trends from an ethical perspective the thesis is developed that they lead inevitably to distinctive ethical dilemmas or tensions in the lived experience of educational participants. The dilemmas though are not seen as realities that can intelligently be either avoided or resolved. They are rather inescapable features of

the trends although they and the experience of them may be managed intelligently to a greater or lesser extent This analysis is premised on the belief that an understanding of the dilemmas may be of practical value in assisting educators and policy makers and managers to live and work more intelligently with them and to better manage the educational changes that are defined by the trends It may thereby contribute to moderating the excesses sillinesses and inanities so often evident in the directing and managing of reforms associated with the trends and to reduce the anguish and pain associated with them
