Mobilities of Return John Taylor, Helen Lee, 2017-12-15 In recent decades the term mobility has emerged as a defining paradigm within the humanities For scholars engaged in the multidisciplinary topics and perspectives now often embraced by the term Pacific Studies it has been a much more longstanding and persistent concern Even so specific questions regarding mobilities of return that is the movement of people back to places that are designated however ambiguously or ambivalently as home have tended to take a back seat within more recent discussions of mobility transnationalism and migration This volume situates return mobility as a starting point for understanding the broader

context and experience of human mobility community and identity in the Pacific region and beyond Through diverse case studies spanning the Pacific region it demonstrates the extent to which the prospect and practice of returning home or of navigating returns between multiple homes is a central rather than peripheral component of contemporary Pacific Islander mobilities and identities everywhere

The Routledge International Handbook of Island Studies Godfrey Baldacchino, 2018-06-13 From tourist paradises to immigrant detention camps from offshore finance centres to strategic military bases islands offer distinct identities and spaces in an increasingly homogenous and placeless world The study of islands is important for its own sake and on its own terms But so is the notion that the island is a laboratory a place for developing and testing ideas and from which lessons can be learned and applied elsewhere The Routledge International Handbook of Island Studies is a global research based and pluri disciplinary overview of the study of islands Its chapters deal with the contribution of islands to literature social science and natural science as well as other applied areas of inquiry The collated expertise of interdisciplinary and international scholars offers unique insights individual chapters dwell on geomorphology zoology and evolutionary biology the history sociology economics and politics of island communities tourism wellbeing and migration as well as island branding resilience and commoning The text also offers pioneering forays into the

study of islands that are cities along rivers or artificial constructions This insightful Handbook will appeal to geographers environmentalists sociologists political scientists and one hopes some of the 600 million or so people who live on islands or are interested in the rich dynamics of islands and island life **The Diaspora Strikes Back** Juan Flores,2010-04-02 In *The Diaspora Strikes Back* the eminent ethnic and cultural studies scholar Juan Flores flips the process on its head what happens to the home country when it is being constantly fed by emigrants returning from abroad He looks at how Nuyoricans Puerto Rican New Yorkers have transformed the home country introducing hip hop and modern New York culture to the Caribbean island While he focuses on New York and Mayaguez in Puerto Rico the model is broadly applicable Indians introducing contemporary British culture to India New York Dominicans bringing slices of New York culture back to the Dominican Republic Mexicans bringing LA culture from fast food to heavy metal back to Guadalajara and Monterrey This ongoing process is both massive and global and Flores novel account will command a significant audience across disciplines

Ecologies of Affect Tonya K. Davidson, Ondine Park, Rob Shields, 2013-06-01 *Ecologies of Affect* offers a synthetic introduction to the felt dynamics of cities and the character of places The contributors capture the significance of affects including desire nostalgia memory and hope in forming the identity and tone of places The critical intervention this collection of essays makes is an active consistent engagement with the virtualities that produce and refract our idealized attachments to place Contributors show how place images and attempts to build communities are rather than abstractions fundamentally tied to and revolve around such intangibles We understand nostalgia desire and hope as virtual that is even though they are not material they are nevertheless real and must be accounted for In this book the authors take up affect emotion and emplacement and consider them in relation to one another and how they work to produce and are produced by certain temporal and spatial dimensions The aim of the book is to inspire readers to consider space and place beyond their material properties and attend to the imaginary places and ideals that underpin and produce material places and social spaces This collection will be useful to practitioners and students seeking to understand the power of affect and the importance of virtualities within contemporary societies where intangible goods have taken on an increasing value
