Dostoevsky and the Epileptic Mode of Being Paul Fung,2017-07-05 For Fyodor Dostoevsky 1821 81 who lived with epileptic seizures for more than thirty years illness is an ineradicable part of existence Epilepsy in his writings denotes both a set of physical symptoms and a state of survival in which the protagonists incessantly try to articulate theorize or master what is ungraspable in their everyday experience Their attempts to deal with what they cannot control or comprehend results in disappointment or what

Dostoevsky called a mystical terror Dostoevsky s heroes are unable fully to understand this state and their existence becomes epileptic in so far as self knowledge and self coincidence are never achieved Fung explores new critical pathways by reexamining five of Dostoevsky s post Siberian novels Drawing on insights from writers including Benjamin Blanchot Freud Lacan and Nietzsche the book takes epilepsy as a trope for discussing the unspeakable moments in the texts and is intended for students and scholars who are interested in the subject of modernity critique of the visual and dialogues between philosophy and literature Paul Fung is Assistant Professor in English at Hang Seng Management College Hong Kong

Nagin,Francis T. Cullen,Cheryl Lero Jonson,2018-04-17 Deterrence Choice and Crime explores the various dimensions of modern deterrence theory relevant research and practical applications Beginning with the classical roots of deterrence theory in Cesare Beccaria s profoundly important contributions to modern criminological thought the book draws out the many threads in contemporary criminology that are explicitly mentioned or at least hinted by Beccaria These include sanction risk perceptions and their behavioral consequences the deterrent efficacy of the certainty versus the severity of punishment the role of celerity of punishment in the deterrence process informal versus formal deterrence and individual differences in deterrence The richness of the volume is seen in the inclusion of chapters that focus on the theoretical development of deterrence across disciplines such as criminology and economics In an innovative section the role of agents of deterrence is considered Lessons are learned from the practical applications of deterrence undertaken in the areas of policing corrections and the community The closing section includes Michael Tonry s An Honest Politician s Guide to Deterrence Certainty Severity Celerity and Parsimony a reminder of Beccaria s dictum that it is better to prevent crimes than punish them In the current environment deterrence arguments are routinely used to justify policies that do just the opposite Ray Paternoster who contributed two chapters passed away as this volume was being finalized Fittingly this book is dedicated to him and ends with Alex Piquero s poignant remembrance of Ray a path breaking deterrence scholar beloved mentor and ardent supporter of social justice Suitable for researchers and graduate students as well as for advanced courses in criminology this book breaks new ground in theorizing the effects of punishment and other sanctions on crime control The Upper Limit François Bonnet,2019-08-27 Since 1993 crime in the United States has fallen to historic lows seeming to legitimize the country s mix of welfare reform and mass incarceration The Upper Limit explains how this unusual mix came about examining how beginning in the 1970s declining living standards for the poor have defined social and penal policy in the United States making welfare more restrictive and punishment harsher Fran ois Bonnet shows how low wage work sets the upper limit of social and penal policy where welfare must be less attractive than low wage work and criminal life must be less attractive than welfare In essence the living standards of the lowest class of workers in a society determine the upper limit

for the generosity of welfare and for the humanity of punishment in that society The Upper Limit explores the local consequences of this punitive adjustment in East New York a Brooklyn neighborhood where crime fell in the 1990s Bonnet argues that no meaningful penal reform can happen unless living standards and the minimum wage rise again Enlightening and provocative The Upper Limit provides a comprehensive theory of the evolution of social and penal policy *Crime, Punishment and the Prison in Modern China* Frank Dikötter, 2002 This book is a richly textured social and cultural study exploring the profound effects and lasting repercussions of superimposing Western derived models of repentance and rehabilitation on traditional categories of crime and punishment **Criminological Theory** Stephen G.
