The Fabric Of Self A Theory Of Ethics And Emotions:

The Fabric of Self Diane Rothbard Margolis, 1998 The Fabric of Self Diane Rothbard Margolis, Professor Diane Rothbard Margolis, 1998-01-01 Margolis illuminates our path through a cluttered conceptual territory I think this is a straining important contribution to our understanding of emotion and the self Arlie Russell Hochschild author of The Time Bind When Work Becomes Home and Home Becomes WorkMargolis s grasp of the complexities of selfhood in contemporary life is a key contribution of her work She takes us on a fascinating and readable excursion in social theory John P Hewitt author of Dilemmas of the American SelfWays of viewing the self change when social environments change argues Diane Rothbard Margolis in this powerful work of social theory She analyzes six views of the self found in contemporary Western cultures and shows how each plays a critical role in society and in our everyday lives Each image of the self is a moral construct expressing what is forbidden allowed and expected Each was created at a historical moment that demanded a new assessment of fight and wrong No moral orientation is in absolute terms better or worse than any other Margolis contends each continues to exist because it permits or demands some form of action required by contemporary society Although the idea of the self as an individualistic exchanger rational self interested competitive may dominate current discourse especially in market economies Margolis describes other constructs the obligated self the cosmic self the reciprocating self the called person and the civic self She delineates the moral ideas from which these images arise and develops a theory of emotions to explain how we live by several moral orientations simultaneously Her perspective on moral orientations andemotions illuminates such contemporary dilemmas as why women and men may play the same social role guite differently why women encounter the glass ceiling and why nationalism persists despite the growth of world markets The Oxford Handbook of **Identities in Organizations** Andrew D. Brown, 2020-01-09 Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations. In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this

Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies *The History of Emotions* Jan Plamper, 2015 The history of emotions is one of the fastest growing fields in current historical debate and this is the first book length introduction to the field synthesizing the current research and offering direction for future study The History of Emotions is organized around the debate between social constructivist and universalist theories of emotion that has shaped most emotions research in a variety of disciplines for more than a hundred years social constructivists believe that emotions are largely learned and subject to historical change while universalists insist on the timelessness and pan culturalism of emotions In historicizing and problematizing this binary Jan Plamper opens emotions research beyond constructivism and universalism he also maps a vast terrain of thought about feelings in anthropology philosophy sociology linguistics art history political science the life sciences from nineteenth century experimental psychology to the latest affective neuroscience and history from ancient times to the present day

Envisioning America and the American Self Scott Appelrouth, 2019-03-14 This book explores the Democratic and Republican Party platforms from 1840 to 2016 As the only official institutionally sanctioned document espousing the parties views on the state of the nation the platforms present to the party faithful a diagnosis of what ails the country and the promise of possessing the necessary cure In doing so they offer more than a listing of specific issues in need of redress through legislative action and moreover serve as a form of national storytelling through which political parties forge their vision of America and of what it means to be an American Using topic modeling as an entry point into the documents the author moves to consider more closely two related themes those of how the platforms narrate the American self and individual freedom With consideration of the extent to which the parties envision the self as an isolated economic actor or as an individual with a range of duties and obligations to a broader community the spheres of action that they consider focal points for individual autonomy and the extent to which they view liberty as freedom from restraint or freedom to act this book sheds light on the historical trajectory of the growing fracture in American politics as well as the points of convergence across the two parties Moreover positing that behind their divisive rhetoric both share a fundamental vision of what it means to be a person the author argues that perhaps their seemingly intractable differences are more a matter of degree than kind

Feminism, Identity and Difference Susan J. Hekman, 2013-10-18 This study focuses on a set of issues at the forefront of feminist thought in the late 1990s identity difference and their implications for feminist politics As feminism moves into an era in which differences among women the multiple identities of woman and identity politics are all at the centre of feminist discussions new approaches methods and politics are called for *Five Pedagogies, a Thousand Possibilities* Michalinos Zembylas, 2007-01-01 Five Pedagogies A Thousand Possibilities aims at providing the groundwork for articulating sites of enriching pedagogies so that critical hope and the possibility of transformation may stay alive The emotional experiences of

unknowing silence passion desire forgiveness and reconciliation play an important political role in constituting critical resistance. The implications of these ideas are discussed in the context of contemporary concerns about social justice conflict hope and despair. These implications help us realize the potential of unknowing silence passion desire forgiveness and reconciliation as crucial pedagogical tasks and negotiate a hope that is truly critical. As an alternative to pedagogies that negate the ethical and political implications of teachers and students emotional lives the present book demonstrates the need for pedagogies that enable the development of criticality without being overcome by despair.
