*An Annotated Collection of Recent Communications Regarding Responding to Expanding Climate Risks* Gary Yohe, 2024-08-29 This volume is the second annotated collection of essays for the popular press with which I have been involved since 2019 the first was published in March of 2023 Each is annotated with a Prologue Why and an Afterword What has happened since Each was motivated by a climate related issue that was in the public eye for more than the usual 24 hours Each discusses the relevance of robust and evolving science to public discourse about climate change They confront issues involved in building public support for informed decisions about how to allocate scarce funds to personal and social investments to abate adapt or suffer in coping with climate risks The essays sometimes address distractions and deflections that are persistently advanced by organized programs of denial misinformation and disinformation as well as the occasional personal attack

*Environmental Risks of Genetically Engineered Fish* United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Oceans, Atmosphere, Fisheries, and Coast Guard, 2013

*Moral Conflict* W. Barnett Pearce, Stephen W. Littlejohn, 1997-03-20 Moral Conflict the subject of this book is passionate and difficult to resolve Responses that are normally effective such as explaining persuading and compromising can make matters worse and drive people further apart in such conflicts Moral conflicts occur when incommensurate social realities come to clash Disputes about abortion religion in politics and education legal rights for homosexuals and environmental politics are issues in which well intentioned parties have created polarized and diverse patterns of communication The most virtuous actions of each side not only fail but widen the schism Such conflicts require us to find forms of communication that go beyond our normal ways of dealing with disagreement In an original synthesis of communication theory and their own research W Barnett Pearce and Stephen W Littlejohn describe a dialectical tension between the expression and suppression of conflict that can be transcended in ways that lead to personal growth and productive patterns of social action In Moral Conflict several projects are described as practical examples of these new ways of working through difficult struggles

*Regulating Genetically Modified Crops in View of Environmental Risks* Ancui Liu, 2022-05-25 This book analyzes international and Chinese regulatory approaches addressing environmental risks that may be caused by GM crops and examines how China implements its international obligations in its policies and laws Using the legal doctrinal method the book discusses the precautionary principle and the public involvement principle as well as several legal measures at the international law level and in Chinese law It observes that legal principles and measures as provided for in China's GMO legal framework have generally implemented the international obligations regarding the prevention of environmental risks that may be caused by the cultivation of GM crops and related activities However the book argues that Chinese law lacks an explicit codification of the precautionary principle

and the same is true with regard to public participation the regulatory framework lacks specific obligations It concludes that future research should focus on the application and enforcement of the relevant Chinese legislation and that it is also important to investigate how the environmental risks that may be caused by new techniques such as genome editing techniques could be prevented given the experience gained by regulating the cultivation of GM crops and related activities
