**Knowledge in Early Modern England** Subha Mukherji,Tim Stuart-Buttle,2018-05-17 The primary aim of *Knowing Faith* is to uncover the intervention of literary texts and approaches in a wider conversation about religious knowledge why we need it how to get there where to stop and how to recognise it once it has been attained Its relative freedom from specialised disciplinary investments allows a literary lens to bring into focus the relatively elusive strands of thinking about belief knowledge and salvation probing the particulars of affect implicit in the generalities of doctrine The essays in this volume collectively probe the dynamic between literary form religious faith and the process psychology and ethics of knowing in early modern England Addressing both the poetics of theological texts and literary treatments of theological matter they stretch from the Reformation to the early Enlightenment and cover a variety of themes ranging across religious hermeneutics rhetoric and controversy the role of the senses and the entanglement of justice ethics and practical theology The book should

appeal to scholars of early modern literature and culture theologians and historians of religion and general readers with a broad interest in Renaissance cultures of knowing      Books for Occupational Education Programs Edward Mapp,1971

*Decadent Poetics* J. Hall,A. Murray,2013-08-23 *Decadent Poetics* explores the complex and vexed topic of decadent literature s formal characteristics and interrogates previously held assumptions around the nature of decadent form Writers studied include Oscar Wilde Charles Baudelaire and Algernon Charles Swinburne as well as A E Housman Arthur Machen and Hubert Crackanthorpe      The Ephemeral History of Perfume Holly Dugan,2011-11-01 In contrast to the other senses smell has long been thought of as too elusive too fleeting for traditional historical study Holly Dugan disagrees arguing that there are rich accounts documenting how men and women produced consumed and represented perfumes and their ephemeral effects She delves deeply into the cultural archive of olfaction to explore what a sense of smell reveals about everyday life in early modern England In this book Dugan focuses on six important scents incense rose sassafras rosemary ambergris and jasmine She links these smells to the unique spaces they inhabited churches courts contact zones plague ridden households luxury markets and pleasure gardens and the objects used to dispense them This original approach provides a rare opportunity to study how early modern men and women negotiated the environment in their everyday lives and the importance of smell to their daily actions Dugan defines perfume broadly to include spices flowers herbs animal parts trees resins and other ingredients used to produce artificial scents smokes fumes airs balms powders and liquids In researching these Renaissance aromas Dugan uncovers the extraordinary ways now largely lost that people at the time spoke and wrote about smell objects ambered civited expired fetored halited resented and smeeked or were described as breathful embathed endulced gracious halited incensial odorant pulvil redolent and suffite A unique contribution to early modern studies *The Ephemeral History of Perfume* is an unparalleled study of olfaction in the Renaissance a period in which new scents and important cultural theories about smell were developed Dugan s inspired analysis of a wide range of underexplored sources makes available to scholars a remarkable wealth of information on the topic      **Past Scents**

Jonathan Reinartz,2014-03-30 In this comprehensive and engaging volume medical historian Jonathan Reinartz offers a historiography of smell from ancient to modern times Synthesizing existing scholarship in the field he shows how people have relied on their olfactory sense to understand and engage with both their immediate environments and wider corporal and spiritual worlds This broad survey demonstrates how each community or commodity possesses or has been thought to possess its own peculiar scent Through the meanings associated with smells osmologies develop what cultural anthropologists have termed the systems that utilize smells to classify people and objects in ways that define their relations to each other and their relative values within a particular culture European Christians for instance relied on their noses to differentiate Christians from heathens whites from people of color women from men virgins from harlots artisans from aristocracy and pollution from perfume This reliance on smell was not limited to the global North Around the world Reinartz

shows people used scents to signify individual and group identity in a morally constructed universe where the good smelled pleasant and their opposites reeked With chapters including Heavenly Scents Fragrant Lucre and Odorous Others Reinartz's timely survey is a useful and entertaining look at the history of one of our most important but least understood senses
