symbols at all but a world of shapes symmetries logical ideas and more And in that world the boundary between things being equal and unequal is a gray area or perhaps a rainbow of beautiful vibrant subtly nuanced color As Unequal shows once you go over that rainbow almost everything can be considered equal and unequal at the same time whether it s shapes seen from the right perspective a circle is the same as an ellipse words synonyms or people even numbers It all depends on what features we care about And it s up to us what we do about it That s because mathematics isn t a series of rules facts or answers It s an invitation to a more powerful way of thinking
