## **The Ethics Of Archaeology:**

**The Ethics of Archaeology** Chris Scarre, Geoffrey Scarre, 2006-01-19 The question of ethics and their role in archaeology has stimulated one of the discipline's liveliest debates. In this collection of essays first published in 2006, an international team of archaeologists, anthropologists, and philosophers explore the ethical issues archaeology needs to address. Marrying the skills and expertise of practitioners from different disciplines, the collection produces interesting insights into many of the ethical dilemmas facing archaeology today. Topics discussed include relations with indigenous peoples, the professional standards and responsibilities of researchers, the role of ethical codes, the notion of value in archaeology, concepts of stewardship and custodianship, the meaning and moral implications of heritage, the question of who owns the past or the interpretation of it, the trade in antiquities, the repatriation of skeletal material, and treatment of the dead. This important collection is essential reading for all those working in the field of archaeology, be they scholar or practitioner.

**The Ethics of Archaeology** Christopher Scarre, Geoffrey Scarre, 2006 What role do ethics have to play in archaeology? This collection brings together experts from the worlds of archaeology, anthropology, and philosophy to offer new insights into the key ethical dilemmas facing archaeology today. Timely and stimulating, this collection is required reading for all students and practitioners of archaeology.

**Ethics in American Archaeology** Mark J. Lynott, Alison Wylie, Society for American Archaeology, 1995

**Ethical Issues in Archaeology** Larry J. Zimmerman, Karen D. Vitelli, Julia J. Hollowell, 2003-04-02 Edited volume exploring key issues in ethics for archaeologists. Visit our website for sample chapters.

**The ethics of archaeology** Chris Scarre, 2006

**Ethics in Archaeological Practice** Sarah Kiehl Costello, Sarah Lepinski, 2024-12-31 *Ethics in Archaeological Practice* explores urgent topics and issues in archaeology as currently practiced in the classroom, the field, the museum, and the public sphere. While addressed primarily to archaeologists working in western Asia, the eastern Mediterranean, and North Africa, the volume raises contemporary ethical questions around race, gender, disability, climate change, and cultural heritage that are pressing and relevant to archaeology students and professionals worldwide. The fifteen contributors offer fundamental case studies and practical guidance for best practices and models of high standards of ethical practice in professional conduct. Together, they offer new approaches to advocacy and the responsible stewardship of heritage sites, collections, and the environment. These compelling and generative discussions make the case for a 21st-century archaeology that is proactive and engaged with discourses addressing equity, social justice, anti-colonialism, and climate change.

**Ethics and Values in Archaeology** Ernestene L. Green, 1984

**Appropriating the Past** Geoffrey Scarre, Robin Coningham, 2013 An international and multidisciplinary team addresses significant ethical questions about the rights to access, manage, and interpret the material remains of the past.

**Ethics in Action** Chip Colwell-Chanthaphonh, Julie Hollowell, Dru McGill, 2008-03-01 Based on the Society for American Archaeology's Annual Ethics Bowl, this SAA Press book is centered on a series of hypothetical case studies that challenge the reader to think through the

complexities of archaeological ethics The volume will benefit undergraduate and graduate students who can either use these cases as a classroom activity or as preparation for the Ethics Bowl as well as those who are seeking to better understand the ethical predicaments that face the discipline      **Archaeological Ethics** Karen D. Vitelli, 2006 Looting Reburial and repatriation Relations with native peoples Professional conduct The second edition of *Archaeological Ethics* combines compelling articles on these topics written for a general audience with valuable teaching aids The updated articles provide a fascinating      *Ethical Issues in Archaeology* Larry J. Zimmerman, 2003 A brief guide to cultural resource managers on how to manage public archaeological sites      **The Ethics of Cultural Heritage** Tracy Ireland, John Schofield, 2016-03-12 It is widely acknowledged that all archaeological research is embedded within cultural political and economic contexts and that all archaeological research falls under the heading heritage Most archaeologists now work in museums and other cultural institutions government agencies non government organisations and private sector companies and this diversity ensures that debates continue to proliferate about what constitutes appropriate professional ethics within these related and relevant contexts Discussions about the ethics of cultural heritage in the 20th century focused on standards of professionalism stewardship responsibilities to stakeholders and on establishing public trust in the authenticity of the outcomes of the heritage process This volume builds on recent approaches that move away from treating ethics as responsibilities to external domains and to the discipline and which seek to ensure ethics are integral to all heritage theory practice and methods The chapters in this collection chart a departure from the tradition of external heritage ethics towards a broader approach underpinned by the turn to human rights issues of social justice and the political economy of heritage conceptualising ethical responsibilities not as pertaining to the past but to a future focused domain of social action      *Ethics and the Archaeology of Violence* Alfredo González-Ruibal, Gabriel Moshenska, 2014-11-10 This volume examines the distinctive and highly problematic ethical questions surrounding conflict archaeology By bringing together sophisticated analyses and pertinent case studies from around the world it aims to address the problems facing archaeologists working in areas of violent conflict past and present Of all the contentious issues within archaeology and heritage the study of conflict and work within conflict zones are undoubtedly the most highly charged and hotly debated both within and outside the discipline Ranging across the conflict zones of the world past and present this book attempts to raise the level of these often fractious debates by locating them within ethical frameworks The issues and debates in this book range across a range of ethical models including deontological teleological and virtue ethics The chapters address real world ethical conundrums that confront archaeologists in a diversity of countries including Israel Palestine Iran Uruguay Argentina Rwanda Germany and Spain They all have in common recent traumatic experiences of war and dictatorship The chapters provide carefully argued thought provoking analyses and examples that will be of real practical use to archaeologists in formulating and addressing ethical dilemmas in a confident and constructive manner      *The Ethics of Cultural Heritage* Tracy Ireland, John Schofield, 2014-11-01 It is widely

acknowledged that all archaeological research is embedded within cultural political and economic contexts and that all archaeological research falls under the heading heritage Most archaeologists now work in museums and other cultural institutions government agencies non government organisations and private sector companies and this diversity ensures that debates continue to proliferate about what constitutes appropriate professional ethics within these related and relevant contexts Discussions about the ethics of cultural heritage in the 20th century focused on standards of professionalism stewardship responsibilities to stakeholders and on establishing public trust in the authenticity of the outcomes of the heritage process This volume builds on recent approaches that move away from treating ethics as responsibilities to external domains and to the discipline and which seek to ensure ethics are integral to all heritage theory practice and methods The chapters in this collection chart a departure from the tradition of external heritage ethics towards a broader approach underpinned by the turn to human rights issues of social justice and the political economy of heritage conceptualising ethical responsibilities not as pertaining to the past but to a future focused domain of social action

**The Ethics of Collecting Cultural Property** Phyllis Mauch Messenger, 1999-11 Explores the ethical legal and intellectual issues related to excavating selling collecting and owning cultural artifacts

**Archaeology and Capitalism** Yannis Hamilakis, Philip Duke, 2016-06-03 The editors and contributors to this volume focus on the inherent political nature of archaeology and its impact on the practice of the discipline Pointing to the discipline s history of advancing imperialist colonialist and racist objectives they insist that archaeology must rethink its muted professional stance and become more overtly active agents of change The discipline is not about an abstract archaeological record but about living individuals and communities whose lives and heritage suffer from the abuse of power relationships with states and their agents Only by recognizing this power disparity and adopting a political ethic for the discipline can archaeology justify its activities Chapters range from a critique of traditional ethical codes to examinations of the capitalist motivations and structures within the discipline to calls for an engaged emancipatory archaeology that improves the lives of the people with whom archaeologists work A direct challenge to the discipline this volume will provoke discussion disagreement and inspiration for many in the field

*Our Collective Responsibility* S. Terry Childs, 2004

*Ethics and Archaeological Praxis* Cristóbal Gnecco, Dorothy Lippert, 2014-11-10 Restoring the historicity and plurality of archaeological ethics is a task to which this book is devoted its emphasis on praxis mends the historical condition of ethics In doing so it shows that nowadays a multicultural sometimes also called public ethic looms large in the discipline By engaging communities differently archaeology has explicitly adopted an ethical outlook purportedly striving to overcome its colonial ontology and metaphysics In this new scenario respect for other historical systems worldviews and social accountability appear to be prominent Being ethical in archaeological terms in the multicultural context has become mandatory so much that most professional international and national archaeological associations have ethical principles as guiding forces behind their openness towards social sectors traditionally ignored or

marginalized by their practices This powerful new ethics its newness is based to a large extent in that it is the first time that archaeological ethics is explicitly stated as if it didn't exist before emanates from metropolitan centers only to be adopted elsewhere In this regard it is worth probing the very nature of the dominant multicultural ethics in disciplinary practices because a it is at least suspicious that at the same time archaeology has tuned up with postmodern capitalist market needs and b the discipline along with its ethical principles is contested worldwide by grass roots organizations and social movements Can archaeology have socially committed ethical principles at the same time that it strengthens its relationship with the market and capitalism Is this coincidence just merely haphazard or does it obey more structural rules The papers in this book try to answer these two questions by examining praxis based contexts in which archaeological ethics unfolds

**The Ethics of Cultural Appropriation** James O. Young, Conrad G. Brunk, 2012-02-13 The Ethics of Cultural Appropriation undertakes a comprehensive and systematic investigation of the moral and aesthetic questions that arise from the practice of cultural appropriation Explores cultural appropriation in a wide variety of contexts among them the arts and archaeology museums and religion Questions whether cultural appropriation is always morally objectionable Includes research that is equally informed by empirical knowledge and general normative theory Provides a coherent and authoritative perspective gained by the collaboration of philosophers and specialists in the field who all participated in this unique research project

**After Ethics** Alejandro Haber, Nick Shepherd, 2014-11-05 While books on archaeological and anthropological ethics have proliferated in recent years few attempt to move beyond a conventional discourse on ethics to consider how a discussion of the social and political implications of archaeological practice might be conceptualized differently The conceptual ideas about ethics posited in this volume make it of interest to readers outside of the discipline in fact to anyone interested in contemporary debates around the possibilities and limitations of a discourse on ethics The authors in this volume set out to do three things The first is to track the historical development of a discussion around ethics in tandem with the development and disciplining of archaeology The second is to examine the meanings consequences and efficacies of a discourse on ethics in contemporary worlds of practice in archaeology The third is to push beyond the language of ethics to consider other ways of framing a set of concerns around rights accountabilities and meanings in relation to practitioners descendent and affected communities sites material cultures the ancestors and so on
