The European World, 1870-1975 Thomas Kingston Derry, Thomas Leckie Jarman, 1950 **The European world** T. K. Derry, T. L. Jarman, 1984 **The Economic History of Central, East and South-East Europe** Matthias Morys, 2020-12-29

The collapse of communism in Central East and South East Europe CESEE led to great hopes for the region and for Europe A quarter of a century on the picture is mixed in many CESEE countries the transformation process is incomplete and the economic catch up has taken longer than anticipated The current situation has highlighted the need for a better understanding of the long term political and economic implications of the Central East and South East European historical experience This thematically organised text offers a clear and comprehensive guide to the economic history of CESEE from 1800 to the present day Bringing together authors from both East and West the book also draws on the cutting edge research of a new generation of scholars from the CESEE region Presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and CESEE area studies **Library of Congress Catalogs**

Library of Congress, 1979 **Aspects of European History 1789-1980** Stephen J. Lee, 2008-01-28 Stephen Lee charts the most commonly encountered topics of nineteenth and twentieth century European history from the origins of the French Revolution through the social and political reforms of the last two centuries to the present **Western Society in Transition** Volker Bornschier, 2018-04-24 An enormous acceleration of history has occurred in the current decade thereby radically changing world society in many respects The core countries grouped around the triad formed by the United States Japan and the European Union have experienced successive waves of change marked by phases of ascent unfolding and decay of societal models What seemed stable and predictable in past decades came close to collapse or broke down entirely As a result we are now living through a crisis of legitimation characterized by acute contradictions A new order with a fresh basic consensus around an overarching set of norms that allows problems to be solved efficiently has not yet crystallized Western Society in Transition examines the succession of societal models of the Western world and indications of its probable shape in the future Bornschier characterizes the 1985 1995 period as a decade of Third World debt and depression continued economic decline in the United States a steady ascent of Japan Western Europe s move toward political union and the collapse of the Soviet Union Against this background he sketches various elements of a theoretical perspective he calls evolutionary conflict theory The primary focus of interest of this theory is not on single societies but on measures of social transformation at the core of world society Western Society in Transition deals with fundamental questions How does social order arise and why does it dissolve What provides social cohesion What makes society progress Institutional spheres of Western society such as technology firms the market state building education power conflict and social movements are analyzed in detail Peter Lengyel editor emeritus of the International Social Science Journal says of Western Society in Transition I have never seen such a succinct clear and persuasive treatment which adroitly draws together elements from

economics history sociology and technology into a strictly contemporary kind of political economy This timely assessment of the Western world will be of interest to social scientists historians economists and international relations scholars

The World of Private Banking Youssef Cassis, Philip Cottrell, Iain L. Fraser, 2016-12-05 This is a full and authoritative account of the history of private banking beginning with its development in conjunction with the world markets served by and centred on a few European cities notably Amsterdam and London These banks were usually partnerships a form of organization which persisted as the role of private banking changed in response to the political and economic transformations of the late 18th and early 19th centuries It was in this period and the succeeding Golden Age of private banking from 1815 to the 1870s that many of the great names this book treats rose to fame Baring Rothschild Mallet and

Hottinger became synonymous with wealth and economic power as German French and the remarkably long lasting Geneva banks flourished and expanded The last parts of this study detail the way in which private banking adapted to the age of the corporate economy from the 1870s to the 1930s the decline during and after the Great Depression and the post war renaissance It concludes with an appraisal of the causes and consequences of the modern expansion of private banking no longer the exclusive preserve of partnerships the management of investment portfolios of wealthy individuals and institutions is now a major concern of international joint stock banks

Exiled Shadow Norman Manea, 2023-01-01 A virtuoso collage novel about narrative identity and exile from international literary sensation Norman Manea One of the most eloquent living witnesses of the European 20th century Norman Manea at 87 has brought out *Exiled Shadow* a contemplative work of fiction in a strong clarion translation into English by Carla Baricz A fitting summarization of a rich and deeply honorable career Sam Sacks Wall Street Journal *Exiled Shadow* belongs among the great intricate and uncompromising works of contemporary literature Jan Knoffeke Neue Zürcher Zeitung Switzerland In this vibrant mosaic of voices sources and stories the protagonist known only as the Nomadic Misanthrope leaves communist Romania and is reunited with his friend Gunther an unrepentant Marxist exiled in Berlin Their meeting sparks a spirited dialogue that endures throughout the Nomadic Misanthrope's subsequent decades in the United States At the center of the plot is the figure of the shadow the insubstantial shape of the exile the wandering Jew the death camp survivor the individual under totalitarianism the dark side of the Jungian personality a figure that calls into question the boundaries of the human condition Recalling the beloved nineteenth century German tale of Peter Schlemihl the man who sold his shadow for a bag of gold this is Norman Manea's most daring work yet an intimate record of alienation and endurance

Modern Europe, 1789-Present Asa Briggs, Patricia Clavin, 2014-06-06 Now covering the whole of Europe from the French Revolution to the present day this major new edition has been completely revised and brought up to date The approach embraces the whole continent from both national and regional perspectives and combines political survey with grass roots people history Bringing this history vividly to life the authors use a very broad range of sources including memoirs archives letters songs and newspapers In particular there is new treatment of the following themes Religion and the modern Papacy Immigration in Europe and relationships between minority and majority groups UNESCO The European Bill of Rights The seeds of conflict in Bosnia and Croatia Europe's relations with the wider world with particular attention to the Middle East and Japan

Power to the People Astrid Kander, Paolo Malanima, Paul Warde, 2014-01-05 *Power to the People* examines the varied but interconnected relationships between energy consumption and economic development in Europe over the last five centuries It describes how the traditional energy economy of medieval and early modern Europe was marked by stable or falling per capita energy consumption and how the First Industrial Revolution in the eighteenth century fueled by coal and steam engines redrew the economic social and geopolitical map of Europe and the world The Second Industrial Revolution continued this energy expansion and social transformation

through the use of oil and electricity but after 1970 Europe entered a new stage in which energy consumption has stabilized This book challenges the view that the outsourcing of heavy industry overseas is the cause arguing that a Third Industrial Revolution driven by new information and communication technologies has played a major stabilizing role Power to the People offers new perspectives on the challenges posed today by climate change and peak oil demonstrating that although the path of modern economic development has vastly increased our energy use it has not been a story of ever rising and continuous consumption The book sheds light on the often lengthy and complex changes needed for new energy systems to emerge the role of energy resources in economic growth and the importance of energy efficiency in promoting growth and reducing future energy demand

Time-Space Compression Barney Warf, 2008-03-03 This volume explores the multiple ways in which people experience time space compression in varying historical and geographical circumstances Including economic cultural social political and psychological dimensions of time space compression

As Time Goes By Chris Freeman, Francisco Louçã, 2001-02-15 How can we best understand the impact of revolutionary technologies on the business cycle the economy and society Why is economics meaningless without history and without an understanding of institutional and technical change Does the new economy mean the end of history an we best understand the impact of revolutionary technologies on business organization and the business cycle These are some of the questions addressed in this authoritative analysis of modern economic growth from the Industrial Revolution to the New Economy of today Chris Freeman has been one of the foremost researchers on innovation for a long time and his colleague Francisco Lou is an outstanding historian of economic theory and an analyst of econometric models and methods Together they chart the history of five technological revolutions water powered mechanization steam powered mechanization electrification motorization and computerization They demonstrate the necessity to take account of politics culture organizational change and entrepreneurship as well as science and technology in the analysis of economic growth This is an well informed highly topical and persuasive study of interest across all the social sciences

The Spread of Modern Industry to the Periphery Since 1871 Kevin H. O'Rourke, Jeffrey G. Williamson, 2017 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Ever since the Industrial Revolution of the late eighteenth and early nineteenth centuries industrialization has been the key to modern economic growth The fact that modern industry originated in Britain and spread initially to north western Europe and North America implied a dramatic divergence in living standards between the industrial North or West and a non industrial or even de industrializing South or Rest This nineteenth century divergence which had profound economic military and geopolitical implications has been studied in great detail by many economists and historians Today this divergence between the West and the Rest is visibly unraveling as economies in Asia Latin America and even sub

Saharan Africa converge on the rich economies of Europe and North America This phenomenon which is set to define the twenty first century both economically and politically has also been the subject of a considerable amount of research Less appreciated however are the deep historical roots of this convergence process and in particular of the spread of modern industry to the global periphery This volume fills this gap by providing a systematic comparative historical account of the spread of modern manufacturing beyond its traditional heartland to Southern and Eastern Europe the Middle East Asia Africa and Latin America or what we call the poor periphery It identifies the timing of this convergence finding that this was fastest in the interwar and post World War II years not the more recent miracle growth years It also identifies which driving forces were common to all periphery countries and which were not
