An Uncommon Vision Des Moines Art Center, Neal David Benezra, Franz Schulze, Louise Rosenfield Noun, Amy N. Worthen, Christopher D. Roy, 1998 This magnificent volume marks the fiftieth anniversary of this museum and art school housed in buildings designed by world renowned architects Eliel Saarinen I M Pei and Richard Meier Illustrated essays cover the history of the Center and its distinguished architecture Colorplates and commentary present more than 100 masterpieces of 20th century art and tribal arts **Uncommon Sense** Alan Cromer, 1995-08-24 Most people believe that science arose as a natural end product of our innate intelligence and curiosity as an inevitable stage in human intellectual development But physicist and educator Alan Cromer disputes this belief Cromer

argues that science is not the natural unfolding of human potential but the invention of a particular culture Greece in a particular historical period Indeed far from being natural scientific thinking goes so far against the grain of conventional human thought that if it hadn t been discovered in Greece it might not have been discovered at all In *Uncommon Sense* Alan Cromer develops the argument that science represents a radically new and different way of thinking Using Piaget s stages of intellectual development he shows that conventional thinking remains mired in subjective egocentric ways of looking at the world most people even today still believe in astrology ESP UFOs ghosts and other paranormal phenomena a mode of thought that science has outgrown He provides a fascinating explanation of why science began in Greece contrasting the Greek practice of debate to the Judaic reliance on prophets for acquiring knowledge Other factors such as a maritime economy and wandering scholars both of which prevented parochialism and an essentially literary religion not dominated by priests also promoted in Greece an objective analytical way of thinking not found elsewhere in the ancient world He examines India and China and explains why science could not develop in either country In China for instance astronomy served only the state and the private study of astronomy was forbidden Cromer also provides a perceptive account of science in Renaissance Europe and of figures such as Copernicus Galileo and Newton Along the way Cromer touches on many intriguing topics arguing for instance that much of science is essential complete there are no new elements yet to be discovered He debunks the vaunted SETI Search for Extraterrestrial Intelligence project which costs taxpayers millions each year showing that physical limits such as the melting point of metal put an absolute limit on the speed of space travel making trips to even the nearest star all but impossible Finally Cromer discusses the deplorable state of science education in America and suggests several provocative innovations to improve high school education including a radical proposal to give all students an intensive eighth and ninth year program eliminating the last two years of high school *Uncommon Sense* is an illuminating look at science filled with provocative observations Whether challenging Thomas Kuhn s theory of scientific revolutions or extolling the virtues of Euclid s *Elements* Alan Cromer is always insightful outspoken and refreshingly original

Corpse Magic Michael Taussig, 2025-03-28 *Corpse Magic* examines beliefs about vengeance the slain magically enact on their killers focusing on lethal violence in Colombia and the United States *Corpse Magic* is a response to the global ubiquity of violence In this bracing new work the influential anthropologist Michael Taussig puts killings in Colombia by gangs and guerrillas police and the military and agents of agribusiness in conversation with mass shootings and police killings disproportionately of Black people in the United States In both contexts he examines the effects of violent killing on its victims its perpetrators and those who witness and relive it through media footage Drawing from literature religion philosophy and anthropology Taussig traces the idea that the act of killing infects the killer and spreads outward then connects this concept of contagion to beliefs in Colombia and elsewhere that the souls of the slain possess those of their slayers and that magic can be used to empower or thwart corpses as agents of vengeance In this powerful and imaginative work Taussig asks what kind of power the dead

continue to have what kinds of magic can manage that power and what if anything can stop seemingly endless cycles of violence Uncommon Senses Chuck Slaght,2012-05 *An Uncommon Union* John D. Hannah,2009 This insightful history explores the stereotype of Dallas Theological Seminary as an anti intellectual stronghold of fundamentalism and dispensational premillennialism The tenures of the school s five presidents reveal the tensions that DTS a blend of differing heritages and of opposing traditions has experienced amid changes in American religious and cultural life **International Relations in Uncommon Places** J. Beier,2005-06-10 The central claim developed in this book is that disciplinary International Relations IR is identifiable as both an advanced colonial practice and a postcolonial subject The starting problematic here issues from disciplinary IR s relative dearth of attention to indigenous peoples their knowledges and the distinctive ways of knowing that underwrite them The book begins by exploring how IR has internalized many of the enabling narratives of colonialism in the Americas evinced most tellingly in its failure to take notice of indigenous peoples More fundamentally IR is read as a conduit for what the author terms the hegemonologue of the dominating society a knowing hegemonic Western voice that owing to its universalist pretensions speaks its knowledge to the exclusion of all others

Uncommon Sense, Common Nonsense Jules Goddard,Tony Eccles,2012-05-03 This is a book for managers who know that their organisations are stuck in a mindset that thrives on fashionable business theories that are no more than folk wisdom and whose so called strategies that are little more than banal wish lists It puts forward the notion that the application of uncommon sense thinking or acting differently from other organisations in a way that makes unusual sense is the secret to competitive success For those who want to succeed and stand out from the herd this book is a beacon of uncommon sense and a timely antidote to managerial humbug Uncommon Friendships William Young,2010-01-01 *Uncommon Friendships* explores the often overlooked dynamic of interreligious friendships considering their significance for how we think about contemporary religious thought By exploring the dynamics of three relationships between important religious thinkers Franz Rosenzweig and Eugen Rosenstock Huesy Emmanuel Levinas and Maurice Blanchot and Julia Kristeva and Catherine Clement this study demonstrates the ways such friendships enable innovation and transformation within religious traditions For each pair of thinkers the sustained engagement and disagreement between them becomes central to their religious and philosophical development helping them to respond effectively and creatively to issues and problems facing their communities and societies Through a rereading of their work Young shows how such friendships can help us rethink religion aesthetics education and politics as well as friendship itself Philosophy at the Edge of Chaos Jeffrey A. Bell,2006-12-15 From the early 1960s until his death French philosopher Gilles Deleuze 1925 1995 wrote many influential works on philosophy literature film and fine art One of Deleuze s main philosophical projects was a systematic inversion of the traditional relationship between identity and difference This Deleuzian philosophy of difference is the subject of Jeffrey A Bell s *Philosophy at the Edge of Chaos* Bell argues that Deleuze s efforts to develop a philosophy of difference are best understood

by exploring both Deleuze's claim to be a Spinozist and Nietzsche's claim to have found in Spinoza an important precursor. Beginning with an analysis of these claims, Bell shows how Deleuze extends and transforms concepts at work in Spinoza and Nietzsche to produce a philosophy of difference that promotes and in fact exemplifies the notions of dynamic systems and complexity theory. With these concepts at work, Deleuze constructs a philosophical approach that avoids many of the difficulties that linger in other attempts to think about difference. Bell uses close readings of Plato, Aristotle, Spinoza, Nietzsche, Heidegger, Derrida, and Whitehead to illustrate how Deleuze's philosophy is successful in this regard and to demonstrate the importance of the historical tradition for Deleuze. Far from being a philosopher who turns his back on what is taken to be a mistaken metaphysical tradition, Bell argues that Deleuze is best understood as a thinker who endeavoured to continue the work of traditional metaphysics and philosophy.

Visual Phenomenology Erika Goble, 2016-11-10 This volume, the second in Max Van Manen's Phenomenology of Practice series, brings together personal narrative, human research methodology, and an extensive knowledge of aesthetic discourse to redefine the sublime in terms of direct and immediate experience. Erika Goble first traces the concept's origin and development in Western philosophy, revealing how efforts to theorize aesthetic quality in axiomatic or objective frameworks fail to account for the variety of experiential paradoxes that can be evoked by a single image. She then examines several first-person descriptions of encounters with the sublime in order to reflect on a series of questions that have escaped aesthetic philosophy so far: What makes an experience uniquely sublime? What does this experience reveal about the human phenomenon of sublimity when it is evoked by an image? What does the experience of the sublime reveal about ourselves as being in the world with images? Goble's book is a corrective to the rampant philosophizing in contemporary discussions of the sublime and an invaluable contribution to phenomenological research.

Plotting the News in the Victorian Novel Jessica R. Valdez, 2020-05-01 This work shows that novelists often responded to newspapers by reworking well-known events covered by Victorian newspapers in their fictions. With each chapter addressing a different narrative modality and its relationship to the news.

Accessing Academic Discourse J. R. Martin, Karl Maton, Y. J. Doran, 2019-11-07 Academic discourse is the gateway not only to educational success but to worlds of imagination, discovery, and accumulated wisdom. Understanding the nature of academic discourse and developing ways of helping everyone access, shape, and change this knowledge is critical to supporting social justice. Yet education research often ignores the forms taken by knowledge and the language through which they are expressed. This volume comprises cutting-edge work that is bringing together sociological and linguistic approaches to access academic discourse. Systemic functional linguistics (SFL) is a long-established and widely known approach to understanding language. Legitimation Code Theory (LCT) is a younger and rapidly growing approach to exploring and shaping knowledge practices. Now, evermore, research and practice are using these

approaches together This volume presents new advances from this inter disciplinary dialogue focusing on state of the art work in SFL provoked by its productive dialogue with LCT It showcases work by the leading lights of both approaches including the foremost scholar of SFL and the creator of LCT Chapters introduce key ideas from LCT new conceptual developments in SFL studies using both approaches and guidelines for shaping curriculum and pedagogy to support access to academic discourse in classrooms The book is essential reading for all applicable and educational linguists as well as scholars and practitioners of education and sociology
