Exploring Our Dimensional Being Frederick R.

Kipp, 2017-02-23 Throughout our lives most of us have been conditioned to view the essence of our human being and the greater realm of creation itself as somehow mysterious and unknowable In many ways it seems as if we have relegated our lives to dense matter as the central focus of our identity Exploring the possible inner or metaphysical realities can provide an orientation and detail necessary for greater understanding of ourselves and the dimensional spheres of life that connect us My lifes work has included studying the underlying structures that support all physical manifestation as well as the beings that live within and work to sustain them I believe that all inner and outer life forms and entities are dimensionally connected We are continuously interacting with them unconsciously through various levels of our being the collective consciousness of humanity our planet and the celestial bodies in the universe My experience has been that the lack of awareness of our own greater being is what hinders our ability to comprehend the universe multidimensionally In my view before entering our present dense physical forms as humans we have progressed through many developmental cycles as did our Earth solar system and universe This book documents what I have learned about the universal creative process and dimensional human evolution from our source beginnings to the present I have tried to integrate the various accounts of the scientific mythological religious and metaphysical versions of cosmology cosmogenesis and cosmogony Exploring the inner realms of possible connections between humanity Earth and the cosmos has been a complex undertaking and journey into uncharted

Reimagining God and Resacralisation Alexa Blonner,2019-05-14 This book shows that widespread resacralisation has been taking place which is producing new ways of perceiving God and the divine The last century has seen unmistakable changes in religious practices and the concept of spirituality right across the world There was a broad expectation for much of the twentieth century that religious worldviews would eventually succumb to the challenge of secularist materialism but this process of secularisation has yet to occur as predicted The book begins by contrasting theories of secularisation and resacralisation Throughout the book conceptual threads or new religious themes related to this resacralisation are discussed in terms of three main categories reimagining God's nature substance and location reimagining human value and purpose and reimagining modes of redemption Finally the book considers how these threads are moving in various different directions and what the religious future might hold This is a bold examination of contemporary spirituality that will appeal to academics and scholars of religious studies new religious movements and the sociology of religion

The Evolution of Life and Form Annie Besant,2017-11-15 First published in 1900 *The Evolution of Life and Form* presents in book form a series lectures given in India in 1898 by Brother Annie Besant a prodigious thinker prolific public speaker and prominent Co Mason This book explains in detail the Theosophical perspective on human Evolution and the structure of life

Through the combination of Eastern Mysticism and Western Science Besant set out a new cosmology of the world specifically in regard to the spiritual hierarchy and the evolutionary mechanisms contained within *Popular Lectures on Theosophy* Annie Besant,1912

Handbook of Religion and the Authority of Science Jim R. Lewis,Olav Hammer,2010-11-19 There has been a significant but little noticed aspect of the interface between science and religion namely the widespread tendency of religions to appeal to science in support of their truth claims Though the appeal to science is most evident in more recent religions like Christian Science and Scientology no major faith tradition is exempt from this pattern Members of almost every religion desire to see their truths supported by the authority of science especially in the midst of the present historical period when all of the comforting old certainties seem problematic and threatened The present collection examines this pattern in a wide variety of different religions and spiritual movements and demonstrates the many different ways in which religions appeal to the authority of science The result is a wide ranging and uniquely compelling study of how religions adapt their message to one of the major challenges presented by the contemporary world
