Excerpt from *The Evolution of Modern Germany*

Although the writing of this book was begun several years ago unavoidable circumstances have delayed its completion. Yet the delay has not to the writer at least been a disadvantage since it has extended the perspective of his subject and has made it possible to base many opinions and conclusions upon a wider survey and a larger generalisation than would otherwise have been possible. The title of the book sufficiently describes the aim which the writer has had in view that of tracing the transformation of the Germany of half a century ago into the Germany which we know to day. That transformation has been essentially economic hence economic questions largely occupy the following pages. At the same time several other problems which closely affect the internal and external development of the Empire have been passed in review. It may be desirable though it should not be necessary to say that the book is not intended to have any bearing whatever upon the economic issues which exercise the British public at the present time. The chapters have been made as little technical as possible though several of them are necessarily occupied by a recital of facts and figures illustrative of industrial and commercial progress. This book is not intended to be either a glorification or a disparagement of Germany from the standpoint of industry and labour. It seeks to show the Germans as a trading nation just as they are to describe their efforts energies successes to tell British readers what they ought to know and must know if they would understand how it is that Germany has gone ahead so rapidly during recent years not however by way of discouraging but of reassuring them.
