## **The Evolution Of The International Economic Order:**

The Evolution of the International Economic Order William Arthur Lewis, 2015-03-08 Do rich industrial nations underestimate the threat to their economic stability posed by demands for a new international economic order Are the developing countries wrong to assume that their economic advancement depends on a transfer of wealth from the richer nations Sir W Arthur Lewis's provocative analysis of the present economic order and its origins suggests that the answer to both questions is yes Professor Lewis perceptively illuminates aspects of recent economic history that have often been overlooked by observers of international affairs He asks first how the world came to be divided into countries exporting manufactures and countries exporting primary commodities High agricultural productivity and a good investment climate allowed countries in Northwest Europe to industrialize rapidly while the favorable terms of trade they enjoyed assured them and the temperate lands to which Europeans migrated of continuing dominance over the tropical countries At the core of the author's argument lies the contention that as the structure of international trade changes the tropical countries move rapidly toward becoming net importers of agricultural commodities and net exporters of manufactures Even so they continue to depend on the markets of the richer countries for their growth and they continue to trade on unfavorable terms Both of these disadvantages he concludes stem from large agricultural sectors with low productivity and will disappear only as the technology of tropical food production is revolutionized Originally published in 1978 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

*The International Legal System in Quest of Equity and Universality* Laurence Boisson de Chazournes, Vera Gowlland-Debbas, 2021-10-18 Georges Abi Saab began his writing and teaching at a time when the process of decolonization and thereafter the quest for emancipation began to make its far reaching impact on the international scene producing significant changes in the international environment both quantitatively in increasing the number of nation States and qualitatively in changing patterns of interests and claims This was bound to result in new pressures on the international legal system itself and in a questioning of the traditional Eurocentric content of international law In his work and teaching Professor Abi Saab viewed the dynamics of international law as a function of two driving forces the emergence of the third world and the sense of injustice In his view the first driving force the emergence of the third world raised the problem of exclusion exclusion from participation in the elaboration of international law and the decision making process and exclusion as beneficiaries of the resulting rules of international law At the same time this new force introduced diversity into the international scene reflecting the richness of the international community in its different facets This process remains relevant today reflecting the contemporary problem of exclusion of new actors as well as their quest for participation The second driving force the sense of injustice posed a teleological problem for him that of defining community values in order that they capture the different facets of justice whether formal or distributive So long as there is no effective organic structure international law in his view will continue to remain effectiveness oriented reflecting rather than impacting on the structures of power Nevertheless it is undeniable that there is an on going process of development of community values and interests as Georges Abi Saab wrote with reference to international crimes law like all social phenomena is a continuous unfolding a continuous process of elaboration He has also considered that the dynamics of the international legal process itself can be captured from the perspective of international organizations as vehicles for change in the international system From his early writings Georges Abi Saab approached the United Nations Charter as a blueprint both normative and institutional for a certain type of international society International

institutions with all their imperfections continue for him to be the means of realization of the law of cooperation which lies at the heart of his concept of the international system The themes selected for this volume in honour of Professor Georges Abi Saab are intended to reflect his unique and pioneering contribution to the field of international law The contributors are drawn from what he has always considered to be his large family of former students in his forty years of teaching Georges Abi Saab has acted as mentor to generations of students from all over the world who have benefited from his vision insights originality and creative and stimulating use of language The contributors also include colleagues and friends who share a similar vision of the international legal system

Global Fracture Michael Hudson, 2005-04-20 Hudson is one of the tiny handful of economic thinkers in today's world who are forcing us to look at old questions in startling new ways Alvin Toffler best selling author of *Future Shock* and *The Third Wave* This new and updated edition of Michael Hudson's classic political economy text explores how and why the US came to achieve world economic hegemony Originally published as the sequel to Hudson's bestselling *Super Imperialism* *Global Fracture* explores American economic strategy during a key period in world history In 1973 many of the world's most indebted countries sought to free themselves of trade dependency and the debt trap by creating a New International Economic Order NIEO This aimed to improve the terms of trade for raw materials and build up agricultural and industrial self sufficiency *Global Fracture* shows how the US undermined this progressive initiative and instead pushed for financial dominance over the rest of the world Today the NIEO is a forgotten interlude its optimism replaced by the financial austerity imposed by the IMF and the World Bank Exploring how America achieved its economic aims and tracing the implications this has had through subsequent decades Michael Hudson covers various topics including trade embargoes changing US attitudes to foreign aid the rise of protectionism government regulation of international investments the impact on specific industries including the oil industry the implications of the new economic order and the future of war

Classical Liberalism and International Economic Order Razeen Sally, 2002-01-04 This book makes an innovative link between classical liberalism and questions of international economic order The author begins with an outline of classical liberalism as applied to domestic economic order He then surveys the classical liberal tradition from the Scottish Enlightenment to modern thinkers like Knight Hayek and Viner Finally he brings together the insights of thinkers in this tradition to provide a synthetic overview of classical liberalism and international economic order The author's deployment of classical liberalism strikes a different note to other liberal interpretations in economics and political science In particular classical liberalism points to the domestic preconditions of international order and advocates unilateral liberalisation in the context of an institutional competition between states
