Nazis in the New World Aaron Gillette, 2025-05-27 The incredible story of Nazi German exchange students in the United States during WWII In the 1930s international exchange students in the United States celebrated their Christmas breaks in Florida enthusiastically engaged in college aged antics rowdy parties and the defiance of authorities In between such mayhem they admired the beauty of America quietly discussed their impressions of their host country and agonized over their future which would now be reshaped by their study abroad experiences These were not typical international college students however These students were Nazis In Nazis in the New World Aaron Gillette reveals the unknown history of Nazi German exchange students sent to America in the 1930s After receiving the Gestapo s stamp of approval they were instructed to use their charm and charisma to promote the Third Reich Some also served Hitler as covert operatives against the United States In many cases the Nazi government came to regret sending its students across the ocean Gillette argues that Nazism was an abject failure in the United States that antisemitism was on the decline that German espionage in America was a disaster for the Reich and that FDR and J Edgar Hoover brilliantly manipulated Nazi blunders to propel America into the war against Hitler and to empower the FBI Meanwhile numerous German exchange students in the United States were transformed from Nazis into fiercely patriotic Americans

Students, Staff and Academic Mobility in Higher Education Mike Byram, 2009-03-26 Academic mobility in higher education is an old phenomenon but it has become a high profile issue as the numbers of students and staff engaged and the number of countries involved has increased hugely in the last few decades For this reason and many others political cultural and educational this book reports research on the many facets of the experience and people involved both now and in the past The emphasis in research has so far tended to focus on contemporary student mobility but this collection deliberately includes articles on mobile staff because the question of

mobility is a matter for universities and higher education in its entirety and not just a matter of bringing new students into existing and unchanging lectures laboratories and seminars Despite the fact that universities are and have been international institutions in their composition from the beginning universities became in the 19th and 20th century de facto national institutions This has changed and continues to change in the 21st century for many reasons but often financial as universities seek to enhance their budgets in a globalised economy and students seek to enhance their employment chances by acquiring qualifications with a difference However even if the starting point is financial nonetheless the chapters in this book demonstrate that the effects of mobility are much more far reaching The effects are on host universities on the university community of staff and students on the ways in which staff and students understand the nature of university study on the ways students may or may not integrate with a local community By experiencing something different for institutions an influx of students with different ideas about academic study for students an interaction with locals and with other internationals for staff a challenge to their assumptions about teaching and learning all see themselves in a new light and are often forced to change This book charts the changes which are happening now and will undoubtedly continue for the foreseeable future It therefore offers all involved a reflection on their own experience and practice and the means of improving them

Culture Shock for Asians in U.S. Academia Eunkyong Lee Yook, 2013-11-26 Culture Shock for Asians in U S Academia Breaking the Model Minority Myth discusses the unique cultural challenges that Asians face in U S academia The issues facing Asians in academia are worthy of our attention for two major reasons the numerical significance of Asians in U S academia and the fact that their problem has been largely eclipsed due to their visible success and status as model minority Asian immigrants are often called the model minority because of their Confucianist work ethic and emphasis on ye or social order as well as the high value placed on education Additionally Asians generally have often been stereotyped as excelling in academics However they face serious problems in adjusting to the U S academic system These problems are due to cultural patterns and variables that are largely invisible yet nonetheless have an undeniable impact on academics The issues that affect students ranging from kindergarten through graduate school and that also affect scholars in academic careers beyond the formative process are reviewed systematically in this book Analysis of issues is based on intercultural communication theories and suggestions for overcoming these challenges are suggested Becoming aware of and addressing the roadblocks for Asians is important not only for Asian students and scholars but also for educators education administrators and institutions Additionally helping Asians to overcome the challenges in academia not only helps academia to become a more inclusive place where all students can learn and all scholars can work in academia successfully it also benefits society by producing a more literate educated and qualified workforce overall By promoting understanding of this important topic in a systematic and theoretic fashion valuable resources can be realized to their full potential

The Management of Intercultural Academic Interaction Hiroyuki Nemoto, 2011-05-25 As university student exchanges provide participants with increasing

opportunities to involve themselves in different academic cultures it has become crucial to gain a better understanding of cultural contact between academic systems and to recognise how exchange students with diverse academic backgrounds interact in a host academic context This book provides insights into this research area by undertaking a one academic year ethnographic examination of six Japanese exchange students management of intercultural academic interaction at an Australian university as well as analysing the impact of the structural arrangements of the student exchange program on their participation In this book the theory of language management is utilised alongside of the concept of legitimate peripheral participation and a socio constructionist genre theory to investigate the cognitive and situated nature of the management processes The theory of language in education planning is also applied to examine the policies and practices of student exchanges between Japanese home universities and an Australian host university Focussing on Japanese exchange students responses to various academic tasks as well as on their everyday participation in class the present study mainly analyses the students negotiation of norms awareness and evaluations of contact situation phenomena planning and implementation of management strategies discontinuation of academic management and the developmental processes of their academic participation This study also investigates various types of tensions in structuring student exchanges among policies practices educational needs and goals of Japanese exchange students their motivational investments and accessibility of current exchange systems to the students Based on the findings this book provides important theoretical implications for sociolinguistic research and SLA studies by discussing the detailed mechanisms of academic management and by reconsidering the importance of the integration of sociocultural perspectives into the cognitive processes of intercultural academic interaction The theoretical inquiries which this study conducts will furthermore promote our understanding of linguistic minority exchange students management of participation in various academic contexts and suggest the ways home and host universities support these exchange students transition between the two different academic cultures
