The Explanation Of Social Behaviour:

The Explanation of Social Behaviour Rom Harré, Paul F. Secord, 1973 **Essays on Ethics, Social Behaviour, and Scientific Explanation** J.C. Harsanyi, 2012-12-06 When John Harsanyi came to Stanford University as a candidate for the Ph D I asked him why he was bothering since it was most unlikely that he had anything to learn from us He was already a known scholar in addition to some papers in economics the first two papers in this volume had already been published and had dazzled me by their originality and their combination of philosophical insight and technical competence However I am very glad I did not discourage him whether he learned anything worthwhile I don't know but we all learned much from him on the foundations of the theory of games and specifically on the outcome of bargaining The central focus of Harsanyi's work has continued to be in the theory of games but especially on the foundations and conceptual problems The theory of games properly understood is a very broad approach to social interaction based on individually rational behavior and it connects closely with fundamental methodological and substantive issues in social science and in ethics An indication of the range of Harsanyi's interest in game theory can be found in the first paper of Part B though in fact his own contributions are much broader and in the second paper the applications to the methodology of social science The remaining papers in that section show more specifically the richness of game theory in specific applications **Cognitive Analysis of Social Behavior** J.-P. Codol, J.-Ph. Leyens, 2012-12-06 The fifth Summer School organized by the European Association of Experimental Social Psychology was held in Aix en Provence France from July 12 to 31 1981 Previous schools had taken place in The Hague The Netherlands in 1966 Leuven Belgium in 1967 Konstanz Germany in 1972 and in Oxford Great Britain in 1976 This is an important activity of the European Association and has always met with great success This time 130 applications were received while only 50 could be accepted given the format adopted for the Summer School They represented many different countries and institutions To fully understand the aims of such a Summer School especially of the present one it is probably best to consider first its organization Participants were graduates or young postdoctoral students in experimental social psychology For three weeks they worked in five teams of ten participants each under the mentorship of a senior researcher Each of five staff members had suggested a special topic of study in which they were interested well before the start of the session This enabled the teams to be determined early enough for the participants to be able to prepare for the sessions In Aix in the magnificent surroundings of an old convent afternoons and often evenings as well were spent discussing theoretical issues arising from the suggested topics and in planning research to test specific hypotheses **The Scientific Study of Social Behaviour (Psychology Revivals)** Michael Argyle, 2013-11-26 Originally published in 1957 this book presented an up to date account of psychological research into human social behaviour of the time There are chapters on interaction between pairs of people behaviour in small social groups and human relations in industry The author avoided the adoption of any particular theoretical position and concentrated on the established empirical findings of the time The results

of several hundred investigations are summarised and compared so that the principal generalisations which emerge can be seen. Stress is placed on rigorous methods of research and a critical account is given of current techniques of social research showing the importance of experimental and statistical methods. Careful consideration is given to the danger of the investigator disturbing what is being investigated. Use is made of recent ideas about theory and explanation and the different kinds of theory used in experimental psychology were considered for the first time as possible ways of accounting for group behaviour. This book was intended not only for students of psychology and of the other social sciences but also for industrialists, administrators and indeed all who were interested in the laws underlying social behaviour. Today it can be read and enjoyed in its historical context.

The Analysis of Social Skill W. T. Singleton, 2013-03-09. This is the book of a conference held at Leuven, Belgium, from June 5-9, 1979, under the same title. The conference was sponsored by the Scientific Affairs Division of the North Atlantic Treaty Organisation, Brussels. We would like to thank Dr Bayraktar of NATO for his part in facilitating the organisation and support of the conference. We are also indebted to the authorities of the University of Leuven who provided excellent facilities and particularly to Professor Verhaegen of the Department of Psychology who acted as academic host to our conference. The aim of the conference was to bring together two groups of psychologists who have been developing in parallel their particular methods of studying and describing human behaviour. The skill psychologists began with the study of motor skills which are relatively easily observable in real jobs and recordable in the laboratory. More recently interests have shifted from motor skills through perceptual skills to the process skills where the operator is attending to many sources of information in the form of dials, charts and computer outputs and adjusting some process to maintain its stability and maximise the yield. Currently problems are arising of how to analyse situations in which several skilled individuals work closely together in small team performance. The social psychologists have followed an analogous but different path of progress.

Explanation in Social Science Robert Brown, 2013-10-15. This is volume II of twenty-two of the Social Theory and Methodology series. Originally published in 1963, the present study has as its aim the discussion of certain questions of philosophical interest as they come to be imbedded in the work of social scientists. It is intended to be an essay which might be of interest to the practising scientist.

The Explanation of Social Behaviour Rom Harré, Paul Frank Secord, 1972.

The Causal Power of Social Structures Dave Elder-Vass, 2010-06-17. The problem of structure and agency has been the subject of intense debate in the social sciences for over 100 years. This book offers a solution. Using a critical realist version of the theory of emergence, Dave Elder-Vass argues that instead of ascribing causal significance to an abstract notion of social structure or a monolithic concept of society, we must recognise that it is specific groups of people that have social structural power. Some of these groups are entities with emergent causal powers distinct from those of human individuals. Yet these powers also depend on the contributions of human individuals and this book examines the mechanisms through which interactions between human individuals generate the causal powers of some types of social structures. The

Causal Power of Social Structures makes particularly important contributions to the theory of human agency and to our understanding of normative institutions James S. Coleman Dr Jon Clark, Jon Clark, 2005-08-10 James S Coleman was one of a distinguished generation of sociology students who passed through the Columbia Sociology Department in the 1940s and 50s This book critically debates his work and his contribution to society and the social sciences more generally It consists of 18 major papers by 20 authors from six countries on a range of themes The volume is framed by an extended editorial introduction reflecting on the five year exchange of correspondence between James Coleman and the editor together with two of Coleman s own works Explaining Social Behavior Jon Elster, 2007-04-30 This book is an expanded and revised

edition of the author s critically acclaimed volume Nuts and Bolts for the Social Sciences In twenty six succinct chapters Jon Elster provides an account of the nature of explanation in the social sciences He offers an overview of key explanatory mechanisms in the social sciences relying on hundreds of examples and drawing on a large variety of sources psychology behavioral economics biology political science historical writings philosophy and fiction Written in accessible and jargon free language Elster aims at accuracy and clarity while eschewing formal models In a provocative conclusion Elster defends the centrality of qualitative social sciences in a two front war against soft literary and hard mathematical forms of obscurantism

Explanation of Morality C. W. Maris, 2013-11-22 a Two things fill the mind with ever new and increasing admiration and awe the oftener and the more steadily we reflect on them the starry heavens above and the moral law within Thus Kant formulates his attitude to morality Critique of Practical Reason p 260 He draws a sharp distinction between these two objects of admiration The starry sky he writes represents my relationship to the natural empirical world Moral law on the other hand is of a completely different order It begins from my invisible self my personality and exhibits me in a world which has true infinity but which is traceable only by the understanding and with which I discern that I am not in a merely contingent but in a universal and necessary connection p 260 So Kant sees morality as a separate metaphysical order opposed to the world of empirical phenomena Human beings belong to both worlds According to Kant the personality derives nothing of value from its relationship with the empirical world His part in the sensuous world of nature places man on a level with any animal which before long must give back to the rest of nature the substances of which it is made **Classical Sociological Theory** Bert N. Adams, R A Sydie, 2002-01-29 A concise yet surprisingly comprehensive theory text given the range of ideas historical context and theorists discussed Unlike other books of the type Classical Sociological Theory focuses on how the pivotal theories contributed not only to the development of the field but also to the evolution of ideas concerning social life
