twelfth ribs have just come in with this lot but the twelfth dorsal vertebra to which they belong was attached to the lower half. Imagine the trouble he must have taken to do that and without cutting or hacking the bones about either. It is extraordinary. This is rather interesting by the way. Handle it carefully. He picked up the breast bone daintily for it was covered with wet mud and handed it to me with the remark: That is the most definite piece of evidence we have. You mean I said that the union of the two parts into a single mass fixes this as the skeleton of an

Freeman, 2021-12-07 Dr Richard Austin Freeman MRCS LSA 11 April 1862 28 September 1943 was a British writer of detective stories mostly featuring the medico legal forensic investigator Dr Thorndyke. He invented the inverted detective story a crime fiction in which the commission of the crime is described at the beginning usually including the identity of the perpetrator with the story then describing the detective's attempt to solve the mystery. Roberts said that this invention was Freeman's most noticeable contribution to detective fiction. Freeman used some of his early experiences as a colonial surgeon in his novels. Many of the Dr Thorndyke stories involve genuine but sometimes arcane points of scientific knowledge from areas such as tropical medicine metallurgy and toxicology.

Freeman, 2018-03-06 The school of St Margaret's Hospital was fortunate in its lecturer on Medical Jurisprudence or Forensic Medicine as it is sometimes described. At some schools the lecturer on this subject is appointed apparently for the reason that he lacks the qualifications to lecture on any other. But with us it was very different. John Thorndyke was not only an enthusiast a man of profound learning and great reputation but he was an exceptional teacher lively and fascinating in style and of endless resources. Every remarkable case that had ever been reported he appeared to have at his fingers ends every fact chemical physical biological or even historical that could in any way be twisted into a medico legal significance was pressed into his service and his own varied and curious experiences seemed as inexhaustible as the widow's curse. One of his favorite devices for giving life and interest to a rather dry subject was that of analyzing and commenting upon contemporary cases as

reported in the papers always of course with a due regard to the legal and social proprieties and it was in this way that I first became introduced to the astonishing series of events that was destined to exercise so great an influence on my own life The lecture which had just been concluded had dealt with the rather unsatisfactory subject of survivorship Most of the students had left the theater and the remainder had gathered round the lecturer's table to listen to the informal comments that Dr Thorndyke was wont to deliver on these occasions in an easy conversational manner leaning against the edge of the table and apparently addressing his remarks to a stick of blackboard chalk that he held in his fingers

with whom he had two sons He entered the Colonial Service and was sent to Accra on the Gold Coast Career In 1891 he returned to London after suffering from blackwater fever but was unable to find a permanent medical position and so decided to settle down in Gravesend and earn money from writing fiction while continuing to practise medicine His first stories were written in collaboration with John James Pitcairn 1860 1936 medical officer at Holloway Prison and published under the nom de plume Clifford Ashdown His first Thorndyke story The Red Thumb Mark was published in 1907 and shortly afterwards he pioneered the inverted detective story in which the identity of the criminal is shown from the beginning Some short stories with this feature were collected in The Singing Bone in 1912 During the First World War he served as a captain in the Royal Army Medical Corps and afterwards produced a Thorndyke novel almost every year until his death in 1943 Freeman claimed to have invented the inverted detective story in his 1912 collection of short stories The Singing Bone Some years ago I devised as an experiment an inverted detective story in two parts The first part was a minute and detailed description of a crime setting forth the antecedents motives and all attendant circumstances The reader had seen the crime committed knew all about the criminal and was in possession of all the facts It would have seemed that there was nothing left to tell but I calculated that the reader would be so occupied with the crime that he would overlook the evidence And so it turned out The second part which described the investigation of the crime had to most readers the effect of new matter
