The Embodied Image Juhani Pallasmaa, 2011-05-16 The Embodied Image The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image The Embodied Image is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind *Psychology Around Us* Ronald Comer, Elizabeth Gould, 2012-02-07 Comer and Gould s *Psychology Around Us* demonstrates the many often surprising always fascinating intersections of psychology with students day to day lives Every chapter includes sections on human development brain function individual differences and abnormal psychology that occur in that area These cut across sections highlight how the different fields of psychology are connected to each other and how they connect to everyday life Every chapter begins with a vignette that shows the power of psychology in understanding a whole range of human behavior This theme is reinforced throughout the chapter in boxed readings and margin notes that celebrate the extraordinary processes that make the everyday possible and make psychology both meaningful and relevant The text presents psychology as a unified field the understanding of which flows from connecting its multiple subfields and reinforces the fact that psychology is a science with all that this implies research methodology cutting edge studies the application of critical thinking *Encyclopedia of Creativity* Mark A. Runco, Steven R. Pritzker, 1999-08-02 This encyclopaedia provides specific information and guidance for everyone who is searching for greater understanding and inspiration Subjects include theories of creativity techniques for enhancing creativity individuals who have made contributions to creativity The Soul Paul Ham, 2025-08-05 Wonderfully entertaining Michael McGirr Sydney Morning Herald I am absolutely in awe of this book Hugh Mackay AO Almost everyone

thinks they have one but nobody knows what it is For thousands of years the soul was an organ an entity something that was part of all of us that survived the death of the body and ventured to the underworld or to heaven or hell The soul could be saved condemned tortured bought And then mysteriously the soul disappeared The Enlightenment called it the mind And today neuroscientists demonstrate that the mind is the creation of the brain The religious soul lives on in the minds of the faithful while the secular soul means whatever you want it to mean In *The Soul A History of the Human Mind* critically acclaimed historian Paul Ham embarks on a journey that has never been attempted to restore the idea of the soul to the human story and to show how belief in and beliefs arising from the soul mind have animated and driven the history of humankind The Soul is much more than a mesmerizing narrative and uniquely accessible way of explaining our story It transforms our understanding of how history works It persuasively demonstrates that the beliefs of the soul mind are the engines of human history

Limón and La Malinche Patricia Seed, 2008-02-01 Jos Limón 1908-1972 was one of the leading figures of modern dance in the twentieth century. Hailed by the New York Times as the finest male dancer of his time when the Jos Limón Dance Company debuted in 1947, Limón was also a renowned choreographer who won two Dance Magazine Awards and a Capezio Dance Award, two of dance's highest honors. In addition to directing his own dance company, Limón served as artistic director of the Lincoln Center's American Dance Theater and also taught choreography at the Juilliard School for many years. In this volume, scholars and artists from fields as diverse as dance history, art history, Mesoamerican ethnohistory, Mexican American studies, music studies, and Mexican history come together to explore one of Jos Limón's masterworks, the ballet *La Malinche*. Offering many points of entry into the dance, they examine *La Malinche* from various angles, such as Limón's life story and the influence of his Mexican heritage on his work; an analysis of the dance itself, the musical score composed by Norman Lloyd; the visual elements of props and costumes; the history and myth of *La Malinche*, the indigenous woman who served the Spanish conquistador Hernán Cortés as interpreter and mistress; *La Malinche*'s continuing presence in Mexican American culture; and issues involved in a modern restaging of the dance. Also included in the book is a DVD written and directed by Patricia Harrington Delaney that presents the ballet in its entirety, accompanied by expert commentary that sets *La Malinche* within its artistic and historical context.
