Exciting New Publication Details Our Geothermal Heritage Through the Ages and Around the World

A new and exciting book is here off the press—with a fresh but timeless topic—the history of mankind living on a geothermal planet. Published by the Geothermal Resources Council and the International Geothermal Association, *Stories from a Heated Earth: Our Geothermal Heritage*, is neither a volume about nor a technical treatise. Instead, its focus is on people, and how geothermal phenomena have affected cultures around the world.

Stories from a Heated Earth painstakingly compiled and edited by Raffaele Cardillo (geothermal consultant-Italy), Susan Hodgson (California Division of Oil, Gas & Geothermal Resources) and John Lund/Oregon Institute of Technology Geo-Hot Center's. Created to collect, preserve, interpret and distribute global geothermal history prior to the Industrial Revolution, the 588-page volume with 212 photographs and illustrations is a unique amalgamation of both fact and fiction—real and imaginary accounts of our geothermal heritage unlike anything ever published before.

Covering more than 25 countries, this beautifully crafted paperback book is written in an easy, nontechnical style designed for broad appeal. The 47 international authors of *Stories from a Heated Earth* found the historical information presented by the superb volume in the realms of archaeologists, historians, geographers, anthropologists, scientists and engineers. Inspiration flowed from artists, photographers, poets, philosophers, and literary figures—with geothermal quotations from Chinese and Japanese poets, Homer, Shakespeare, Pushkin, Herman Melville, Mark Twain and Edgar Allan Poe.

In addition, *Stories from a Heated Earth* derives interesting tales and practices from ancient manuscripts and the oral tra-

dition, never before recorded. And antique quotations in over 50 languages were extracted for the book from pottery, drawings, maps, votive statues, shrines, oracles, myths and legends. All contribute to the fascinating reading offered within the covers of this engaging, "must have" addition to both geothermal and historical libraries.

From the dawn of history, people have been entranced by the wonder and beauty of geothermal manifestations. Prehistoric tribes and civilizations in antiquity considered the "Fire of the Earth" as a gift bestowed

by the gods for the benefit of mankind. Hot springs and fumaroles were described as *Flumen Tartarus* ("Great Mystery") by the Ancient Greeks, *Flumen* ("river") by the Romans, *Flumen* ("river") by the Celts. These beliefs, ingrained in popular customs, traditions, religious folk-inspired rituals, were handed down through hundreds of generations and still influence our customs and thought today.

With their awe-inspiring beauty and sometimes destructive power forever commanding our attention, volcanoes have inspired religious practices, provided fertile
