Darby, 1986-08-15 This collection of essays represents a reflective inquiry into the way in which our world is set apart from its past its present defined and its destiny shaped by technology The contributors tackle the subject from different perspectives within the fields of philosophy and politics **The Power of Ideology** Emanuel Adler, 2024-06-21 In this prodigiously researched book Emanuel Adler addresses the hotly contested issue of how developing nations can emerge from the economic and technological tutelage of the developed world Is the dependence of Third World countries on multinational corporations especially in the realm of high technology a permanent fixture of an inherently unequal relationship Or can it be managed by the developing nations for their benefit By a masterful comparative study of the development of science and technology in Argentina and Brazil the author discusses governmental policies that are effective in attaining autonomous

technological development Professor Adler provides a useful corrective to the structural theories of development that have up to now prevailed in the study of international relations by demonstrating that intellectual and technological elites play a far more significant role in the success or failure of such governmental policies than has hitherto been recognized This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1988

Investing in Development Theodore Moran,2021-12-24 This volume surveys current views in the debate about the impact of foreign direct investment on Third World development on growth employment exports technology and distribution of income It examines whether the efforts of less developed countries to attract and control multinational corporations have constituted a serious distortion of trade that threatens jobs in the home nations It provides new studies of foreign investment in agriculture and in the least developed states It looks at the threat of transmitting environmental pollution And it analyzes the link between international companies and the umbrella of World Bank cofinancing as a mechanism to reduce risk Finally it attempts to estimate how much of the gap in commercial bank lending might plausibly be filled by direct corporate investment over the next decade

Redrawing the Global Economy A. Landau,2001-05-04 Alice Landau investigates the confluence magnitude and dynamics of globalization and regionalization and highlights the integrative and disintegrative effects of both processes She digs deep in to the processes and traces the inequalities embedded in their dynamics The analysis is complemented by a detailed empirical investigation into the geographical distribution of trade investments capital and transnational corporations which are cumulatively concentrated in a few highly developed and developing countries thus limiting the development prospects for the majority of developing countries
